CATALOG

"Trees True To Name"

SUNNYSIDE FARM

HANDY & MERRILL
PROPRIETORS
HAMPDEN, MASS.

May 15, 1922.

Kelly Brothers' Nurseries,
Dansville, N. Y.

Gentlemen:

Public endorsement of worthy merchandise is an uncommon practice but that does not prevent us from informing you of the great success which has attended the planting of your fruit trees in our orchards. In the Spring of 1913 you shipped us 500 PEACH and 100 APPLE trees; in 1914, 1000 PEACH and 200 APPLE trees; in 1915, 600 PEACH and 150 APPLE trees; in 1917, 350 CHERRY and 200 QUINCE, and this Spring 100 APPLE trees. A statement alone which indicates our faith in your trees and which also indicates that since placing our first order with you seven years ago we have been staunch Kelly Brothers' customers, never dissatisfied in any manner as hundreds of the trees referred to above have come into bearing, every one proving True to Name.

I always recommend KELLY trees to my friends and neighbors; in fact, so sure am I of their genuineness that I guarantee them. It is a pleasure to harvest fruit without the disappointment of many other fruit growers, (who buy from unreliable dealers,) of not having the stock come True to Name.

Very truly yours,

HANDY & MERRILL,

By Amos B. Merrill.

We have received hundreds of letters similar to the above from almost every section of the United States and Canada, and if you desire to see some of our stock growing, or to get an expression from some one who has planted our stock--write us about it. It is quite likely there is some one in your vicinity who has planted our stock, and if this is the case we will be pleased to furnish his name and address.

A Few

Words

To You

TO OUR MANY CUSTOMERS and friends and to new patrons, we extend greetings, and take pleasure in handing you herewith our annual catalog that it may be your 1923 guide to correct values and prices of Nursery Stock. It is filled with interesting information and is backed by our 43 years of good reputation, during which time our business has been conducted with old-fashioned honesty and under a Golden-Rule policy of fair dealing with our customers. Our combination of Quality, Price, Service and Accuracy appeals to all careful buyers. We promise complete satisfaction to those who trust their confidence and patronage to us. We are prepared to meet your wants in a manner to afford mutual satisfaction. Our prices and terms you will find are right. Our KELLY SERVICE is free to you. Use it.

THE DEMAND for all kinds of Nursery Stock is particularly strong and we believe there will be a serious shortage, especially in fruit trees, before the season is over. Make selection of stock you want, send in your list of requirements, have your trees reserved for shipment at the proper time. NOW, right NOW, is the time for you to order, as we are selling very closely on some items. Our customers find that KELLY TREES are actually the cheapest; that no better or critically selected can be had at ANY price; that our years of experience insure the best grading, packing and shipping service; that you can't judge tree economy by price, because the real cost of a tree is its cost per year in service.

AS TO THE QUALITY of trees we are now offering—we have **beaten our own Record**. We have the finest trees this year we have ever produced. Notwithstanding the fact that we have the largest acreage of trees we have ever grown, we expect to be sold out much earlier than ever before. Take our advice and order promptly while our assortment is complete and thus insure having what you want.

WE HAVE been supplying Fruit Trees, Small Fruits and Ornamental Stock to the leading growers throughout the country for many years, and we number by thousands the ever-increasing list of our friends and patrons. During all these years a growing host of successful fruit growers and others have put their faith in our Nursery Stock. Our trees are foremost because of their merit. We are always sure of getting our products to a welcome market. We are determined to give our customers the BEST TREES it is possible to produce—trees True to Name, free from disease, fully up to grade specified, at prices you can pay. You will accomplish much toward a successful crop when you plant our Nursery Stock. Ask any of the leading Horticulturists in your neighborhood about KELLY trees.

MAKING permanent customers out of the new friends we gain each year has made us one of the largest nursery firms in the country—has made us a leader. Our customers buy and re-buy simply because they find our trees are not only the BEST value for the money, but the BEST QUALITY at any price. We co-operate with our customers, and our interest in the stock purchased from us has only begun when the stock is delivered. We want you as one of our satisfied customers. We can save you money.

OUR CATALOG is prepared to meet your wants. If you cannot visit our nurseries, order from it with confidence. Keep in mind the Nursery Stock shortage and mail your order at once, thus avoiding the experience of some of our friends and customers of last year who deferred placing their orders until late in the season and were disappointed in not being able to get the stock they wanted. With special emphasis on this point we would urge that if you want our products, you read this catalog, decide on what you want to plant, mail your order to us quickly with the assurance that it will have our careful attention. Establish a personal relation with us and you will be surprised to find how easy and how satisfactory it is to deal by mail with KELLY BROTHERS' NURSERIES.

PLANT AN APPLE ORCHARD FOR PROFIT—HERE ARE THE TREES

This Catalog is Our Only Salesman We Employ No Agents

We could not afford to sell our stock as cheaply as we do if we employed agents whose salaries and commissions often add 50 per cent to 60 per cent to the cost of stock. This catalog is our only representative and in buying from it you **save** the agent's or middleman's large profit. It is not our policy, and we believe it is a waste of your time and ours, for us to explain the methods and practices of some other nurserymen; but we do ask you to not believe the story of the agent who says our trees cannot be first class when we offer them at such low figures. Rather should you be guided by the following taken from the Government Department of Agriculture, Bulletin No. 113:

"If the farmer makes his purchase direct from the nurseryman, he will save the expense of the middleman or agent and is less liable to the mistakes and injuries that may occur through repeated handling."

No. 128

STATE OF NEW YORK

Department of Farms and Markets

BERNE A. PYRKE, Commissioner.

Certificate of Inspection of Nursery Stock

This is to certify that the nursery stock of Kelly Bros. Nurseries of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Article 14 of the Farms and Markets Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1923.

Dated, Albany, N. Y., September 1, 1922.

BERNE A. PYRKE, Commissioner,

By Geo. G. Atwood, Director Bureau of Plant Industry.

Established for Forty-three Years

In 1880 we started in the nursery business and each succeeding year our business has steadily grown larger. We began growing fruit trees on a small scale, gradually increasing our plantings until now we have one of the largest nurseries in the country. In the development of our business our watchword has always been "the best at the lowest possible price." We have always tried to serve our customers so well as to merit their entire confidence and commendation, and we have only to refer to our thousands of satisfied patrons throughout the United States and Canada to prove that we have succeeded in our endeavor. We know that it pays to produce good stock and believe that poor stock, or stock not True to Name, is dear at any price—in fact, worthless, even as a gift. We have no agents and for this reason you can buy trees of us at a great saving as the agent's expenses and commission often add from 50% to 60% to the cost of stock.

Our Stock

Our stock is the finest and best that can be grown. It is all high grade, well-rooted, mature and healthy. No San Jose Scale or Peach Yellows has ever been found in our nurseries. We grow every tree we offer for sale and thus we are able to guarantee it to be strictly **true to name** and **free** from all disease. We plant only the most select imported seedlings. These we plant in soil particularly adapted to the successful raising of nursery stock. Step by step, through the various stages of cultivation and propagation, we exercise the greatest care, with the result that when the trees are mature, we have the finest and best that can be produced.

If you want stock that is True to Name, the only place to buy it is from the nurseryman who grows it, and not from dealers and agents who buy their stock here and there. It is self-evident that trees handled three or four times are often exposed to unfavorable conditions and thus injured. After trees have passed through so many hands, who knows what the varieties are? Our nurseries are regularly inspected by a New York State Inspector and a Certificate of Inspection has been issued to us. A copy of this certificate is attached to every order shipped by us.

Our Equipment

We have gradually increased our equipment until today we believe no other nursery in the country has better facilities for handling orders whether they are large or small. All of our employees are experienced and competent, many of them having been with us for years, thus grasping our ideas of how things should be done. This makes every detail of our large business work out smoothly and accurately. Our modern and up-to-date packing house contains fifteen thousand square feet of floor space and is absolutely frost proof. We have a private switch right to this packing house and thus there is no chance for our trees to be exposed or injured in any way.

Our Personal Supervision

Each department from the planting, propagating and maturing of the trees to the selling through our catalog is in direct charge of a member of our firm. Following are the names of the members and the department to which each gives his attention: James A. Kelly, selection and planting of seedlings; Edward T. Kelly, selection of scions and budding; William F. Kelly digging and grading of trees; Richard A. Kelly, selling through catalog and correspondence; Clement A. Kelly, packing and shipping of orders. It will readily be seen that in this way the best attention is given every branch of our business—better attention than could possibly be given by the most faithful and painstaking employees.

THE FRUIT GROWER'S HARVEST

Our References

As to our responsibility and reliability we ask our prospective customers to inquire of Dun's or Bradstreet's Commercial Agencies; Merchants and Farmers National Bank, Dansville, N. Y., The Citizen's Bank, Dansville, N. Y., or of any person whose letter appears in this catalog.

An Expression From Our Home People

We the undersigned wish to state that we have known the Kelly Brothers for many years and have watched the steady increase in their business until today they are one of the largest growers of fruit trees in the United States. We believe that their success is due to their thorough knowledge of the business and square dealing with their customers, and it is with pleasure that we recommend them to the planter and fruit grower.

Wm. Kramer, President of Merchants & Farmers Bank,
F. A. Owen, President F. A. Owen Publishing Co.,
J. M. Edwards, Cashier of Merchants & Farmers Bank,
All of Dansville, N. Y.

We Strive to Avoid Mistakes

But in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness of name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, growth, productiveness or any other matter.

Important—Be Sure to Read This Page

Our Shipping Season

We pack and ship all winter to Southern states; our regular Spring packing and shipping season usually opens here about the first of March, and continues well into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but **by the condition of the trees to be planted.** Hence, trees can be sent with safety from Dansville, N. Y., to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is passed.

Order Early

As our orders are shipped in the rotation they are received, and as we cannot delay orders received first for orders coming later on, we advise the placing of orders early. If for any special reason it is necessary that an order be shipped on a specified date, make a note on the order and we will comply with the request if possible.

How to Order

Make out your order carefully on the Order Sheet enclosed in this catalog. Write the varieties plainly and set down the prices accurately. Specify clearly the grade and sizes of the trees desired. Indicate plainly how you want the stock shipped, whether by freight, express or mail. If by freight or express, give the name of your railroad station, also your own postoffice address. When specific instructions are not given we will use our own judgment.

How to Remit

Remittances should be made by Post Office Money Order, Express Money Order, Draft on New York Bank or Registered Letter. We disclaim all responsibility unless remittances are made as above directed.

Rates

We allow hundred rates on lots of fifty or more trees, providing your order does not call for less than ten trees of any one variety.

Terms

Cash with order except in large orders when satisfactory reference is given, and then the order must be accompanied by one-fourth cash, and shipment will be made C. O. D. For the benefit of customers who order early, but who do not care to spare all of the money when order is sent, would say, we will accept early orders accompanied by one-third cash and reserve the stock for you. Balance of the amount to be sent when stock is ordered

"The Kind We Grow"

shipped. Prices in this catalog supersede all previous prices.

Small Orders

Because of the increased cost of land, labor, implements, packing material, etc., there is no profit in orders for less than \$2.00 and we cannot accept orders for smaller amounts.

Boxing and Packing Free

We box and pack all orders without charge. All orders are put up in boxes or bales which are lined with heavy paper to guard against stock drying out. The trees and plants are packed in moist excelsior and straw. This is expensive, but good packing pays—pays customers, pays us. We guarantee the arrival of stock in good condition.

Grading

We guarantee every tree to be up to the grade specified, or better. Many times trees are sold by height only. This, we believe, to be very misleading as we have seen trees which belonged to the second or third grade, (if graded by size or caliper) sold for first grade, as they had the required height. We grade and sell our trees both by height and caliper, and believe this to be the only way that gives entire satisfaction to the planter.

Freight and Express Rates

Misrepresentation of the cost of getting stock from us by freight and express is sometimes made by others. Remember, if you bought your stock delivered, or Freight Prepaid, the cost of such prepayment **would be included in the purchase price.** Do not be influenced by the agent or others who say the cost of transportation will bring our prices up as high as theirs, because that is not true, for when you buy, freight prepaid, you are not only paying the cost of this, but also in many cases you pay the agent's commission. Here you will find a statement of the freight and express rates to certain points. If you do not happen to live in any of the places mentioned, you can readily figure out what the rate to your station is, by comparison with a place of about equal distance that is on the list:

Am. Ex- press Rates per 100 lbs.	FROM DANSVILLE, N. Y. A Plain Talk to Our Customers

WE hardly think it is necessary to say anything about the prices printed in this catalog, but since there are so many poor trees, trees not True to Name, trees with a poor root system and affected in one way or another, being put on the market by unreliable firms and agents, we feel compelled to warn our customers against making the error of purchasing such stock. Perhaps you will receive catalogs from nursery firms and individuals quoting lower prices than ours, but we would ask you not to regard price as the index of value. Rather should you investigate the responsibility and stability of the one making such seemingly attractive offers. In many cases such firms are not able to deliver the goods as advertised by them; usually they are not established permanently, have little or no financial responsibility and are not likely to be in business when your trees come into bearing. Events of the past few years prove this statement. Remember, also, it does not pay you to use your valuable land, to devote your time to the growing of fruit trees only to find when they come into bearing that you have something you did not buy, something for which you have little or no use. Buy trees that are backed by a firm of a recognized standard and **responsibility**—one that is established **permanently**.

A few cents difference in the price of a tree does not matter much to you, if you can be sure of getting what you want. The planting of fruit trees is more or less of a permanent proposition, and the price of a tree is the **smallest part of its cost** by the time it has come into bearing, and it would be plain folly for you to risk the loss of your trees, the use of your land for years, expense of fertilizing, cultivating, etc., to save a few cents on a tree when for a trifling increase in price you can get the very best guaranteed stock. Do not get the impression, however, that we are high-priced. We guarantee to compete with anyone both in price and quality. When you buy from us, you get trees that are strong, sturdy and healthy, and you get them at the lowest price at which trees of such high character can be sold. "Good goods at lowest prices" is our motto, and we simply refuse to sell inferior trees at any price.

Advice to Planters

Preparation of the Soil—Prepare a rich, deep bed of mellow soil, and have the land sufficiently drained to relieve the roots from standing water. To insure a fine growth land should be in as good condition as is required for a crop of wheat, corn or potatoes.

Preparation of Trees or Other Stock—We use great care in digging and packing, but the loss of some small roots and fibers is unavoidable. If stock is properly prepared before it is planted, no permanent injury will result from this, but the preservation of the natural balance between top and roots renders a vigorous cutting back of the former absolutely necessary in most cases. And, therefore, prune off broken ends of roots, if any (a smooth cut root granulates or makes ready to extend sooner than one broken off), cut back the tops to the extent of about one-half the previous season's growth, taking care at all times to prune in such a manner as will tend to develop a well formed head, sufficiently open to admit air and light freely. Evergreen and other ornamental trees, the beauty of which depends on preserving their natural form, should be pruned very little. Hence, great pains should be taken in planting and caring for these. If not ready to plant when the stock arrives, "heel it in" by placing the roots in a trench and covering them with mellow earth, well packed.

Planting—Make the holes large enough to admit the roots without any cramping or bending, and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots, and this should be carefully worked among them. If the ground is dry it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the planter upon it, so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of the full benefit of their natural protection. Omission to pack the earth solidly is a most frequent cause of failure in planting nursery stock. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Always remove the label when planting. If this is left until the tree is grown, the connecting wire often cuts into and destroys the tree or branch to which it may be attached. When planting dwarf trees set them low enough to cover the stock upon which they are budded, three or four inches.

Mulching—When trees or bushes are planted, they should be mulched or covered with a layer of coarse manure or litter from three to six inches deep for a space of say, two feet more in diameter than the extent of the roots. This keeps the earth moist and at an even temperature.

After-Culture—Grass should not be allowed to grow about young trees or plants. The ground should be cultivated for a space of at least a foot outside the roots. If the ground is poor it should be enriched with surface application of manure. Pruning should be varied according to the condition of the tree and the purpose of the planter. It should be done regularly every spring before the buds swell any. In this way the removal of any large branches will be avoided.

A Table Showing the Number of Trees or Plants to the Acre by the Square System

Distance	No. of Trees	Distance	No. of Trees	Distance	No. of Trees
1 foot apart each way	43,560	9 feet apart each way	537	17 feet apart each way	150
2 feet " " " "	10,890	10 " " " "	435	18 " " " "	134
3 " " " "	4,840	11 " " " "	360	19 " " " "	120
4 " " " "	2,722	12 " " " "	305	20 " " " "	108
5 " " " "	1,745	13 " " " "	257	25 " " " "	69
6 " " " "	1,210	14 " " " "	222	30 " " " "	48
7 " " " "	888	15 " " " "	193	35 " " " "	35
8 " " " "	680	16 " " " "	170	40 " " " "	27

Rule.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43,560), will give the number of trees to an acre.

Distances for Planting

Standard Apples	40 feet apart each way
Standard Pears and Strong Growing Cherries.....	20 " " " "
Duke and Morello Cherries.....	18 " " " "
Standard Plums, Peaches, Apricots and Nectarines.....	16 to 18 " " " "
Dwarf Pears, Dwarf Apples and Quinces.....	10 to 12 " " " "
Grapes.....	rows of 10 to 16 feet apart; 7 to 16 ft. in rows
Currants and Gooseberries.....	4 feet apart
Raspberries and Blackberries.....	3 to 4 feet by 5 to 7 feet
Strawberries, for field culture.....	1 by 3 to 3½ feet
Strawberries, for garden culture.....	1 to 2 feet apart
Asparagus in beds.....	1 by 1½ feet
Asparagus in fields.....	1 by 3 feet

"You'll Never Regret Planting Kelly Trees"

Direct from Grower to Planter

Advice to Planters (Concluded)

The Planting of Fruit Orchards

We have had frequent inquiries from our customers and prospective ones as to the best plan for the setting out of fruit orchards, and we always recommend planting by the square system—a diagram of which we give below. The advantages of this system are its simple form, the trees are uniform in line and they can be cultivated two different ways, thus securing nearly all the cultivation necessary by horse power.

We advise the setting of permanent apple trees forty feet apart each way, as the diagram shows. Peach or Cherry trees could be used as fillers 20 feet apart each way. This plan gives the farmer or fruit grower some returns from his orchard three or four years after it is planted. Then in fifteen or twenty years, when the Peach and Cherry trees have outlived their usefulness, they can be removed, leaving to the Apple trees the entire space. According to this plan it takes about twice as many fillers as it does permanent trees for an acre.

Under no circumstances do we advise planters to mix Pear or Quince with Apple trees. They should be kept as far apart from the Apple as possible for the reason that they are sometimes susceptible to blight, and this is carried to the Apple trees by insects. Should the Pears or Quince be affected by blight—which they are some seasons—the cultivation needed for same would be different than for Apples. As soon as

TWO YEAR APPLE

The one represents a two year apple tree untrimmed; the other, a tree with both head and roots, correctly trimmed for planting.

DIAGRAM OF SQUARE PLAN

In the above diagram the circles represent the Permanent trees planted 40 feet apart each way; the black dots represent Fillers planted 20 feet apart each way.

as blight appears, cultivation of Pear or Quince orchards should cease, at least, for that season. This is done to prevent them from making any further new growth, as the blight is carried by the insects from the affected branches to the newer growth which is more easily penetrated by the bills and claws of the insects. The blight cannot spread itself. We strongly urge that during the blighting season there should be no attempt to cut off blighted limbs, as very often they are not cut off below the affected part, the sap oozes from the cut, and the insects are able to do more damage than if the blighted branches remained on the trees. The following spring they could be removed below the affected parts with safety.

The Pollinizing of Varieties

Many varieties will not bear well when planted alone or in large blocks. This is because they require the pollinizing from blossoms of other varieties. Inasmuch as all varieties benefit by cross pollination, it is a good thing to plant four or five rows of one variety, and then four or five rows of another, and so on.

FRUIT DEPARTMENT

Apple Trees

IT IS an established fact that of all fruits the apple is the most important. It has been rightly called the "King of Fruits." Unlike other fruits its period of ripening extends nearly throughout the year, and by judicious selection of varieties, an almost constant succession may be obtained. It is not a luxury, but a staple article of food, and the demand for good apples is increasing faster than the supply. Experienced and successful farmers and orchardists agree that there is more money in growing apples than in any other fruit, and that the orchard is the farm's greatest asset. If there is any kind of trees that we specialize in growing, it is the apple. We use the very best quality of imported French Apple Seedlings to propagate our apples on. We believe this to be of utmost importance in order that the trees may have a good foundation, be free from all disease and insure a healthy and permanent growth. We have discarded all varieties not profitable to the planter, and recommend the following varieties, giving a brief description of each.

Prices of All Varieties of Apple Trees

					Each	Ten	Hundred
Largest Size	2 Year	6 to 7 Feet	$\frac{3}{4}$ and up	XXX	.70	\$6.50	\$50.00
Medium Size	2 Year	5 to 6 Feet	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.65	6.00	45.00

Summer Varieties

Early Harvest—(Yellow Harvest.) Medium to large; pale yellow; beautiful; fine flavor. Tree moderate, erect grower, good bearer; excellent variety for both orchard and garden. Ripens in August.

Yellow Transparent—Tree upright, and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest. One of the most popular market varieties. Ripens in August.

Red Astrachan—Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good, though rather acid; one of the best of the summer varieties for cooking. The fruit usually sells for a good price in local market. Ripens in August.

Sweet Bough—Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Autumn Varieties

Alexander—An excellent apple for culinary use. Fruit large, firm, crisp, tender, juicy, mild sub-acid. Skin smooth, glossy, pale yellow to "orange yellow" entirely overspread with lively red stripes. Tree large, vigorous and hardy. Season September to November.

Duchess of Oldenburg—Vigorous growth; Russian; large; striped; tender, juicy, sub-acid; good; regular and abundant bearer. One of the hardiest kinds known. Ripens in Sept.

Fall Pippin—Very large; yellow, tender, juicy and rich. Tree a vigorous, free grower and fine bearer. An excellent baking apple. Ripens in October.

Fameuse—(Snow Apple.) Hardy, medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits, and valuable for market. Ripens in Nov.

The Old Reliable Baldwin in Bearing

Maiden's Blush—Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant but not high flavor. A good market sort because of its attractiveness and the tree's heavy crops. Ripens in September.

Pound Sweet (Pumpkin Sweet)—A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. Oct. and Nov.

Wealthy—This beautiful, moderate sized, brilliant red apple is of fine quality, one of the best of its season; it is a relatively good keeper and owing to the hardiness of the tree, its adaptability to cold climates, and early bearing habits, it can be profitably planted as a filler. Season Oct. to Jan.

Gravenstein—This is a large, handsome apple streaked and splashed with red over a strong yellow. The flesh is yellowish, firm, fine, crisp, tender, juicy and sub-acid. In quality it ranks very good to best. Sept. to Nov.

Winter Varieties

Baldwin—What the Bartlett pear is to pears the Baldwin is to apples for the Eastern and Middle States. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape than the Baldwin. It is esteemed as an eating apple, and for cooking. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Keeps until April.

Ben Davis—A popular apple in Southern New York, Pennsylvania and Ohio. Fruit is medium to large, of a bright, deep red color, or red striped over clear yellow. Has a thin, tough skin. The flesh is whitish, firm, juicy and sub-acid. It is one of the best keeping apples on the market today, lasting in cold storage until June or July.

"You'll Never Regret Planting Kelly Trees"

Kelly Bros' Nurseries, Dansville, N.Y.

Winter Apples (Continued)

Northern Spy—This variety ranks about third in commercial importance with the fruit growers of Pennsylvania, New York and Ohio, being surpassed by Baldwin and R. I. Greening. Fruit is large and very attractive, being of bright red color with a delicious bloom; flesh is very juicy, crisp, tender and excellent for dessert or culinary uses. Its fine reputation brings high prices in the market and the fruit is always in demand. The fruit is ready for use in November or December; keeps well in cold storage until April, or if more carefully handled, until May.

Stark—Fruit fair, smooth, uniform and attractive. Large, striped, mild, sub-acid. Valuable as a keeper. A good variety for the commercial orchard because the tree is thrifty, hardy, healthy, a reliable cropper and very productive. Jan. to May.

Grimes' Golden—Vigorous grower; large; golden yellow; juicy, sprightly sub-acid; very good. Keeps until April.

Gano—Similar but superior to Ben Davis. It has all the good qualities in a higher degree, more brilliant coloring, runs more even in size, and keeps fully as late. The tree is vigorous and hardy; is a rapid grower; bears while young. Color bright red without stripes or blotches, and large and even in size. Keeps until March.

Jonathan—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Nov. to Apr.

King—(King of Tompkins Co.) One of the largest red winter apples. It is of extraordinary size, beautiful in color, attractive, and always brings the highest market price. Its size, beauty and good flavor make it in great demand. Nov. to March.

McIntosh Red—Medium size, nearly covered with dark red. Flesh white, fine, very tender, juicy and refreshing with attractive quince-like flavor. A good annual bearer. A very hardy variety, fruit of which is very attractive in appearance, of deep red color, good size, the flesh very tender and delicious. It is especially desirable for fancy trade. It comes into bearing young, yielding large crops of good fruit almost annually.

Mammoth Black Twig—The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very high flavored. Keeps until late Spring.

Northwestern Greening—Tree a splendid, vigorous grower, quite hardy. Fruit large to very large; green, becoming yellowish green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive; should be given plenty of room in the orchard to secure large, even fruit. Keeps until March.

Spitzenburg—(Esopus.) Medium to large; deep red, high flavored; valuable for commercial purposes. November to April.

Tolman Sweet—Medium, pale yellow, slightly tinged with red; firm, rich and very sweet; the most valuable baking apple; vigorous, hardy and productive. Keeps until April.

York Imperial—This is a fine, hardy, large red, winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Good shipper, bringing highest prices.

Hubbardston (Nonesuch)—This Apple is one of the earliest bearers. Large, striped yellow and red; flesh yellow, juicy and tender with an agreeable flavor of acidity and sweetness; strong grower; bears well every year. The tree is vigorous and very productive. It is especially adapted to New York and Pennsylvania, also the New England States. November to March.

McIntosh Red Apple

ORDER EARLY

ONE ORDER IS ALL WE ASK. OUR GOODS WILL TAKE CARE OF THE FUTURE

Direct from Grower to Planter

Winter Apples (*Continued*)

Paragon—Late keeper, large of good color and quality, very productive. Dec. to May.

Wagener—(Red Winter Apple.) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. Dec. to May.

Rhode Island Greening—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

Stayman's Wine Sap—Tree vigorous, hardy, spreading. An early bearer and very productive; fruit medium size, round, approaching conic; skin smooth, greenish yellow, splashed and striped with red and purple; flesh yellow, firm, tender, juicy, rich, sub-acid, aromatic, quality best. Splendid late keeper.

Wolf River—Fruit is very large, some specimens weighing 27 ounces, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

Smokehouse—A very pleasant flavored dessert apple. Tree a vigorous grower; healthy,

Rhode Island Greening

hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Seek-No-Further—Medium to large; dull red color; flesh crisp, tender and juicy. November to February.

Yellow Belleflower—Season, winter. A hardy apple of large size, a beautiful golden color, often with red blush; conical in shape.

Picture of one of our large blocks of two year old Apple Trees, taken in early summer

Winter Apples (Continued)

Golden Russet—Vigorous growth; medium; russet; crisp, juicy, mild sub-acid; hardy; very good; long keeper. Nov. to Apr.

Twenty Ounce—Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. Oct. to Jan.

Rambo—Medium, flat streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. Oct. to Dec.

Rome Beauty—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit, Rome Beauty is a variety Eastern orchardists should plant largely. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York and West Virginia will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure bearing make it a favorite with the grower. Fine quality for use and for handling make it popular with consumers and dealers. When packed in boxes shows up splendidly.

Sutton Beauty—Medium to large; roundish; handsome, waxen yellow, striped crimson; flesh tender, juicy, sub-acid; good quality; keeps well. The tree is a free grower and very productive. Keeps until February.

Wealthy Apple

Winter Banana—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates; its wonderful productiveness will bring quicker and larger returns than any other apple in the orchard. The fruit has a richness of flavor that cannot be described. Flesh golden yellow, fine grained,

Roxbury Russet—The most popular russet Apple. Fruit, large, firm, moderately tender, juicy, sprightly, sub-acid, good. Skin almost smooth but usually covered with greenish to yellowish brown russet. Tree a free grower, spreading; vigorous, hardy, a great bearer. Its great popularity is due to its productiveness and long keeping. Dec. to May.

WHOLE ROOT TREES---UPLAND GROWN BRING RESULTS

Our trees are propagated on whole root, imported seedlings, and not by grafting on piece roots. This insures the heavy, fibrous root system which is so essential to first class trees. We plant seedlings on upland ground where there is good air drainage and thus we are certain that the trees will be perfectly hardy, and absolutely free from injury of any kind. They are full of vitality and are the trees for YOU---Mr. Planter.

NOTE SPECIAL PRICES ON SMALLER SIZE TREES ON PAGE 33

Direct from Grower to Planter

Winter Apples—(Con.)

Old Winesap—Winter. Fine keeper; medium size, oblong, smooth, and a fine dark red; flesh yellow, crisp, tender, very juicy, aromatic, firm and good. Tree a strong grower, root-growth exceptionally strong; it comes into bearing early and is remarkable for its regular and abundant crops. One of the very best sorts for lower elevations anywhere south of Pennsylvania, from tide-water to 1,000 feet in Maryland, and to corresponding elevations south of Maryland. One of the sorts you must not overlook for these sections. When grown properly and packed in an attractive manner, it brings the highest prices in the fancy market.

Our big rooted Apple Trees are full of vitality and will transplant without loss.

Northern Spy Apple

Delicious Apple

Delicious—A remarkable variety introduced in the West several years ago where it is being largely planted and rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest, a vigorous grower, with good foliage. A regular annual bearer.

Opalescent—Probably the handsomest Apple ever put on the market. It is large and shapely and a veritable feast to the eye. Color light, shading to very dark crimson; skin smooth; susceptible of a very high polish reflecting objects like a mirror; flesh yellowish, tender, juicy and good. Should prove a very profitable Apple for the early Winter markets. Season December to March.

ORDER EARLY

MIDDLEMEN ADD TO THE COST BUT NOT TO THE QUALITY OF NURSERY STOCK

Crab Apples

Besides producing much sought after fruit the Crab Apple tree is excellent for ornamental purposes. It will grow in any kind of soil and will bear every year. The Crab Apple is a prime favorite with the housewife for jellies and preserves. Many people prefer it to any other fruit for that purpose. We have the following varieties and offer them at the same price as the standard apples.

Transcendent—The best of all Crab-apples; good size, skin yellow striped with red—fine for preserves and jellies. Tree vigorous grower. Ripens in September.

Whitney—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, striped,

splashed with carmine; flesh firm, juicy and rich. Vigorous, handsome.

Hyslop—Almost as large as Early Strawberry Apple; deep crimson; very popular on account of its large size, beauty and hardness. Keeps well into the Winter.

Dwarf Apple Trees

The Dwarf Apple trees come into bearing much earlier than the Standard trees. Their low, broad heads are within reach so that the fruit can be easily picked. These trees take up so little room that they can be planted in the garden, or even on the lawn, and with care will bear good crops within three or four years. The fruit is of extra high quality. Trees bear very early. We have the following list of best varieties of Dwarf Apples to offer.

Baldwin, Delicious, Duchess, Ey. Harvest, Grimes Golden, King, McIntosh, Nor. Spy, Pound Sweet, Red Astrachan, Rome Beauty, R. I. Greening, Stayman's Winesap, Sweet Bough, Wealthy, Winter Banana, Yellow Transparent.

Peach Trees

FOR MANY YEARS it was the popular opinion that peaches would thrive in only certain sections of the country. We know better now. With one or two exceptions it has been shown that this fruit can be grown at a good profit in every state in the Union. Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. Careful cultivation and intelligent pruning will work wonders in the production of peaches. If properly cared for, the trees are sure to bring in a handsome return on your investment. As in other fruits it is imperative, however, that your trees are of the best stock. It is very important that wood growth on peach trees is well ripened and that they have a good and sufficient quantity of fibrous roots, so they will withstand the hot sun and drought that may occur after planting. We have a very good stock of hardy trees, with well ripened wood and an excellent root system, and we make the lowest possible price consistent with the quality of the stock.

Belle of Georgia—First half of August. Fruit very large and most attractive in color and shape, with a light red cheek; flesh white, firm, delicious—in all ways the quality is fine. Trees grow quick in shapely form and are very strong. Hardy, prolific.

Garman—Middle to end of July. Fruit large and broad, oval shaped, yellowish white; flesh creamy white with red tinge, flavor spicy and good. Especially suited to low, wet land, where other sorts will not thrive. Very hardy, and productive every year. A good shipper, quite satisfactory in commercial orchards.

Chair's Choice—Deep yellow, red cheek; firm; a few days earlier than Smock.

Champion—First of August. Fruit large, creamy white, with red cheek; sweet, juicy very high quality, and splendid. Good shipper. Its fault, if anything, is that it is too tender. Hardy and productive.

Crawford's Early—A large, yellow peach of splendid quality; strong grower and prolific fruiter. No other variety has been so extensively planted. First of September.

Crawford's Late—Superb yellow peach of large size and excellent quality; great bearer. One of the finest late varieties. Last of September.

Plant One Year Apple, Cherry, Pear and Peach Trees

We most strongly recommend to the commercial fruit grower, and to those who plant in a small way, that they plant our extra heavy, well branched, one year APPLE, PEAR, CHERRY and PEACH trees. The past growing season has been exceptionally favorable and we have the finest blocks of one year trees to offer at this time that we have ever grown. They have made an exceptionally fine growth and are extra heavy and well branched. These ONE YEAR TREES as well as the two year stock, are budded on the best WHOLE ROOT imported French Seedlings and have an abundance of fine fibrous roots. They will transplant without loss and start growing immediately.

Although our ONE YEAR TREES are graded three feet and up, the one year APPLE will easily average four feet in height; SOUR CHERRY, three to four feet; SWEET CHERRY, four to five feet; PEAR, four to five feet, this year.

You will make no mistake if you follow this suggestion.

Our Peach Trees Budded From Bearing Orchards

The Peach trees we are offering are the finest and best Peach trees we have ever grown. They are propagated on seedlings produced from natural seed gathered in the mountains of North Carolina and are budded from bearing trees in the orchards of A. J. Servis and Son, Youngstown, Niagara Co., N. Y., and F. E. Dean, Youngstown, Niagara Co., N. Y.—two of the leading Peach growers in the United States. This insures trees absolutely True to Name, free from disease, and of the heaviest bearing strain.

It is an established fact that San Jose Scale and Peach Yellows have never been found in our nurseries. We have here in Dansville a resident Inspector of the New York State Department of Farms and Markets, who looks after our stock from seedling to freight car. It is not merely a one time inspection but continuous inspection. We welcome the visits of the Inspector because we know this helps to keep our stock free from disease. Ours is the only nursery center of any importance in the United States that is absolutely free from San Jose Scale.

Elberta—The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early Sept.

Fitzgerald—Originated in Canada. Fully equal to Crawford's Early in size, quality and color, with a much smaller pit; a very early bearer, often when two years from bud; extra hardy succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; highest quality; ripens after Crawford's Early.

Gold Drop—Large, good quality, hardy; a profitable market sort; follows Late Crawford.

Greensboro—Large, beautifully colored, bright red over yellow; flesh white; good quality, good commercial sort. July.

Hiley (Hiley Belle)—Is a large, smooth, white peach with a bright red cheek on the sunny side. Resembles Belle of Georgia but is more highly colored. Flesh white with red streaks, fine, rich, and juicy. Hiley is of great value as an extremely hardy Peach, of best quality, a long keeper, a good shipper, and one which comes at a season when a reliable known Peach of good size is necessary to complete the succession of ripening in the modern commercial orchard. August.

Hale—A description will hardly do justice to this fine variety. In size it is one-third to one-half larger than the Elberta and is more highly colored. The skin is deep crimson, smooth, tight, and without fuzz. Flesh is golden yellow, firm, and has a most delicious flavor. The pit separates easily from the flesh. It is exceptionally valuable as a commercial Peach owing to its unusual keeping and shipping qualities. Will ship nearly as well as an apple. Fruit ripens about five days before the Elberta, but it will hang on the tree longer. Your collection is incomplete without this variety.

Ray—Of good size and has a most attractive red blush of delicate shade. Flesh white, firm and of most excellent quality. Keeps well. A good shipper of fine appearance even after much handling. Trees strong growers, shapely and symmetrical. Old peach orchardists would be surprised to see how quickly they attain good size. A regular bearer of big crops. Ripens Aug. 10th to 25th.

Rochester—Is in a class by itself because it is the only good sized yellow freestone Peach of fine quality ready for market in the middle of August in the northern states. The fruit is large, yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper. Its greater sweetness over other Peaches requires only half the usual quantity of sugar in canning. The tree is a strong grower; early and regular bearer of big crops, and absolutely hardy; two weeks ahead of Early Crawford—maturing when highest market price prevails. Market men seek the Rochester Peach not only for its large size and beauty, but for the further reason that it is a good keeper.

Direct from Grower to Planter

Peaches—(Continued)

"Budding" Requires Skilled Workmen. We Have Them.

Salway—Large; deep yellow, red cheek. Flesh yellow, juicy. October.

Smock (Beer's Smock)—This is an old standard variety, highly prized and valuable for either home use or market. It has a beautiful yellow color, and the flesh is firm, juicy and of high flavor. It is a free stone; ripens very late. Tree is a fine grower and productive. September.

Yellow St. John—Of medium size, orange yellow with a red blush on sunny side; flesh tender, juicy and quality very good. Tree is a strong grower and bears heavy crops every season. Reaches the market at a time when the demand for early fruit is at its height, when properly handled, the best prices can be obtained. Middle August.

Some Figures Worth Thinking About

Statistics and figures are uninteresting unless they express or interpret live practical facts and conditions. The following figures are copied from a Bulletin issued by the Department of Commerce, Bureau of Census, Washington, D. C., dated June 27, 1921:

APPLES:

Trees of bearing age—	
1920	115,265,029
1910	151,322,840
Decrease	36,057,811
Per cent of decrease	23.8
Trees not of bearing age—	
1920	36,171,604
1910	65,791,848
Decrease	29,620,244
Per cent of decrease	45.0

PEACHES:

Trees of bearing age—	
1920	65,654,921
1910	94,506,657
Decrease	28,851,736
Per cent of decrease	30.5
Trees not of bearing age—	
1920	21,623,657
1910	42,266,243
Decrease	20,642,586
Per cent of decrease	48.8

Comparative figures on PLUM and CHERRY trees are the same. This proves conclusively that **NOW IS THE TIME** to plant an orchard as people are using more fruit year after year and the population of the United States is increasing wonderfully. Prices for fruit this season are high—very much above the pre-war prices.

Cherry Trees

A Bearing Orchard of Large Montmorency in Full Bloom

IN THESE days of apparent specialized fruit growing cherries seem to have been neglected. Yet it is safe to say that no fruit will find a more ready market or bring in a larger return on the money invested. The fact that cherry trees can be used for ornamental as well as productive purposes greatly increases their possibilities on the market. Any well-drained soil will be found to be adapted to the sturdy growth of cherry trees. Our cherries are all budded on imported French stocks and these form a fibrous root which reduces considerably the loss in planting. We believe that no fruit will bring greater profits, as the cherry will bear a fair crop two or three years after planting and re-

quires very little care and attention. We have a good assortment of varieties but would especially recommend the Large Montmorency for commercial planting as it bears enormous crops and the canning factories pay a higher price for it than they do for any other sour variety.

Sweet Cherries

Lambert—One of the largest of all Cherries. It is purple-red; firm and rich. Every year sees an enormous crop, and the tree not only grows well, but is a proof against insect and fungous attacks. The finest of shippers.

Black Tartarian—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

"You'll Never Regret Planting Kelly Trees"

Direct from Grower to Planter

Cherries—(Continued)

Napoleon Cherries

Bing—One of the most delicious Sweet Cherries grown. Tree very hardy and vigorous with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

Yellow Spanish—A pale yellow cherry with bright red cheek in the sun. It is one of the best, most beautiful and popular of all of the light colored cherries; vigorous and productive.

Windsor—Tree upright, vigorous and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

Schmidt's Biggareau—The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper. July.

Governor Wood—Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

Napoleon or Royal Ann—A beautiful cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

Bore the First Year

Decatur, Ills., Feb. 4, 1922.

Kelly Brothers' Nurseries,
Danzville, N. Y.

Dear Sirs:—Two years ago I received 70 of your fruit trees, 40 being CHERRY trees, many of which bore the first year.

I am now sending you another order for trees as I know you have first class stock and I will continue to send you orders every Spring.

Yours Very truly,

FRED T. ROARICK, R. F. D. 7.

Cherries— (Continued)

SOUR CHERRIES

Early Richmond—One of the most valuable and popular cherries unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June. The cherry tree bears almost every year, and is an easy fruiter.

May Duke—This is one of the good old standbys which has been so popular for many years in the past, both in the East and West, where it has been largely planted and where it has rewarded the planter by large crops of profitable fruit. The color of this cherry gradually changes from a bright red to nearly black when fully ripe. The flesh is red, becoming dark purple later; is very juicy and melting, rich, acid and of superior quality. It must remain on the tree until fully ripe in order to develop its best character. Season very early. The tree is very hardy and adapted to all localities.

Large Montmorency—This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of the best fruit of all other sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright clear red. The flesh is of fine quality and sub-acid. Fruit ripens 10 days after Early Richmond.

Dyehouse—A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, its early bearing remarkable as its great hardiness. Has the appearance of being covered with a scarlet cloth such is the abundance of the fruit. Has the smallest pit of any cherry known; a splendid keeper and free from knots. For tarts, pies and especially for canning, it has no superiors among cherries. June.

Osthme—Large; skin red, dark at maturity; flesh liver-colored; tender, juicy, almost sweet; very good; hardy.

Wragg—Large, roundish, heart-shaped dark crimson and when fully ripe, black or nearly so; flesh and juice light crimson, firm and good, very productive; one of the hardiest and is usually a sure cropper.

English Morello—Fruit large elongated; almost blackish red when fully ripe; very rich, acid; juicy and good. A splendid pie cherry.

Large Montmorency Cherries

Tree very hardy somewhat smaller than other sorts but exceedingly productive. This fruit is in great demand by the fruit-juice manufacturers. July.

Olivet—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Ripens in June.

Arrived in Fine Condition

North East, Pa., March 9, 1922.
Kelly Brothers' Nurseries,
Dansville, N. Y.

Gentlemen:—Last Spring I purchased from you a number of CHERRY trees and they were the finest lot of trees I have ever seen. They arrived in fine condition and it has been a pleasure to watch them grow.

Enclosed find check to cover cost of trees noted on the enclosed order blank.

Yours truly,
THOMAS MUSCARELLA,
21 Center St.

Satisfied Customers Are Our Best Advertisements

Here are only a very few of the many unsolicited letters we have received from our customers testifying as to the quality of our stock, prompt attention in filling orders, and fair dealing. Read them:

A LARGE PLANTER WELL SATISFIED

South Norwalk, Conn., Feb. 22, 1922.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—

The first shipment of trees received in fine condition. I have not seen them personally, but Mr. Cunert, who is interested with me in the Trinity Lake Fruit & Poultry Farm, reports them to be the finest lot of trees he has ever seen. He also reports them as being very carefully packed, free from disease and not a poor tree in the entire 2000.

We thank you very much for the care you have taken to please us and assure you we will send you our future orders.

Yours very truly,

SAMUEL RANDALL.

Stuyvesant Falls, N. Y., Nov. 25, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—I am very much pleased with the trees you sent me. This makes the sixth time I have had trees from you and in the several thousand trees you have sent me I do not think there has been a single one to throw out. I take this opportunity to thank you not only for the good trees you have sent me at reasonable prices, but also for the many little services and accommodations you have rendered me and my friends I have referred to you. I am enclosing an order I want you to hold for Spring delivery.

Very truly yours,
E. W. MITCHELL.

Rutland, Vermont, Dec. 11, 1920.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—It has been my good fortune several times to have met people who were starting out in a small way and who were looking for a nurseryman that they could depend on. Of course, it goes without saying that I recommended you to them in the best terms. I knew that if they ordered from you they would be treated courteously and that the stock would be True to Name. The trees which I ordered of you some years ago were all received in good shape and of those that have borne everyone so far has proved True to Name.

Yours truly,

H. E. STAFFORD.

Haddonfield, N. J., Feb. 23, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—Last Spring you could fill only part of my order. As some of the trees were for my neighbors they would not listen to ordering part from you and part from another nursery, although they were very much disappointed at not being able to get Kelly trees. I assure you if I had been buying for myself alone I would have gotten all I could from you and then waited until you had the other varieties. In the Fall of 1915 I set out some Apple trees, not from you, and in the Spring of 1916 I set out some Apple trees from you. Purchased the same varieties and sizes from both nurseries. I have had Apples for three years from your trees and last season one Apple from the other trees. There might be better trees than Kelly's but I will have to be shown before I will believe it.

Yours very truly,

H. MORRIS.

Crystal Lake, Ills., March 10, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—The order we received was well packed and in perfect condition when we received it. The men who put up this order evidently knew their business—not a bruise, twist or scar on any of the trees. The quality is A No. 1 plus.

Yours truly,

MORGAN BROTHERS.

Littleton, N. H., Nov. 1, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—The fruit trees arrived here yesterday and they are a fine healthy looking lot. I admire very much the way you had them packed for shipping and need scarcely add they arrived in excellent condition.

Yours truly,

GORDON MURRAY.

Department of Agriculture, State of Maine,

Augusta, Me., Feb. 23, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—I am desirous of securing a small lot of nursery stock principally Apple and Plum trees for 1921 setting and would be very glad to have your Price List or catalog of varieties. Several years ago when conducting experiments in agriculture extension, I secured a large order of small fruits from you and found them most satisfactory in every respect. I am accordingly desirous of trying a sample of your fruit trees and shall be glad to have this information before ordering.

Very truly yours,

FRANK B. WASHBURN, Commissioner.

Patterson Creek, W. Va., May 21, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—Received trees in fine condition, and to be brief, they are the finest trees we have ever purchased; in fact, it is impossible to produce better trees. Wishing you much success, I am,

Yours truly,

ERNEST REID.

The Clemson Agriculture College

Clemson College, S. C., May 4, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—The nursery stock that you have shipped into this state during the past season, or such part as I have had the pleasure of inspecting, has been up to the standard of A No. 1 quality.

Yours very truly,

GEO. P. HOFFMAN,

Extension Horticulturist.

828 W. 5th St., Plainfield, N. J., Apr. 15, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—I have to compliment you on the way in which you handled my recent order. As explained in my order I am a traveling man and expected to be home the week of April 10th to 17th so had to depend on immediate shipment. The stock reached me on April 10th. At the same time I ordered from you I also ordered from one of your competitors. Their stock has not reached me yet and even telegrams remain unnoticed. Wish I had given you the whole order.

Yours truly,

CHARLES T. STRASSLE.

Eaton Rapids, Mich., May 5, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—My order of fruit trees came to hand in due time and we set them out in good shape. I am well pleased with the stock and am enclosing a small additional order which I would like to have sent by Express at once.

Yours very truly,

C. H. WHITTUM.

Rushville, N. Y., Sept. 7, 1921.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—The Apple and Peach trees purchased from you seven years ago are fine. We had about 200 bushels of Peaches this year, the fruit being the finest grown in this county and strictly True to Name. I shall want a few trees next Spring and will place the order with you because I believe Kelly Brothers do business on the square. I can recommend your trees to anyone.

Yours truly,

L. C. WILLIAMS, Lecturer, Grange No. 1137.

Pear Trees

THE value of this fruit is just beginning to be appreciated and its cultivation is extending. Compared with apples, there are few really fine pears on the market. If growers would specialize in this fruit they would be well repaid for their efforts, as high prices are always obtainable for choice pears. Our pears are all budded on imported French stock which gives them the finest root system. We recommend the following varieties:

Prices of All Varieties of Pear Trees

					Each	Ten	Hundred
Largest Size	2 Year	6 to 7 Feet	$\frac{3}{4}$ and up	XXX	\$.80	\$7.50	\$70.00
Medium Size	2 Year	5 to 6 Feet	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.75	7.00	65.00
Smaller Size	2 Year	4 to 5 Feet	$\frac{1}{2}$ to $\frac{5}{8}$	X	.70	6.50	60.00
Largest Size	1 Year	3 Feet and up	Sturdy Buds	XXX	.75	7.00	65.00

8 per cent Discount on all Cash Orders received on or before March 25th. After that date 3 per cent Discount on all Cash Orders.

Bartlett—Rich golden-yellow when ripe, often with a soft blush; large, thin-skinned; buttery and melting, with a rich musky flavor. Tree a strong grower, bears young and abundantly, but requires careful cultivation to bring it up to its highest excellence. Probably more highly esteemed for canning and shipping than any other. Succeeds best as standard, but does well as dwarf. An old favorite. When planting orchards of standard Bartlett, it is recommended that dwarf Bartlett or dwarf Anjou be used for fillers, since it greatly increases the profit. In planting dwarf pears, they should be set into the ground deeper than the standard trees, the union should be 4 to 5 inches below the surface.

Clapp's Favorite—Large fine; pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

Wilder—Medium to small, greenish yellow with a brownish red cheek; melting, sweet and very pleasant; vigorous grower; good bearer.

Howell—Above medium, roundish, pyriform; pale yellow, with mostly a bright red cheek and russet dots; flesh whitish, melting, juicy, with brisk, vinous flavor. Sept. and Oct.

Anjou—This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thor-

oughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Duchess D' Angouleme—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Seckel—A large, round, russet and red pear of very rich fine quality, melting, and delicious. Tree vigorous, bears well. Oct.

Vermont Beauty—Of medium size, roundish, yellow, heavily shaded with carmine; flesh exceedingly fine, sweet and juicy. The tree makes a strong, healthy growth and bears good crops. October.

Seckel—A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Louise Bonne de Jersey—Large size, pale green in the shade but overspread with brownish red in the sun; very juicy and melting with a rich and excellent flavor. Good commercial sort. Sept. to Oct.

Poughkeepsie, N. Y., Apr. 21, 1917.

Kelly Bros., Dansville, N. Y.

Gentlemen: Trees arrived in good condition. A splendid looking lot of Seckel. Thank you for same.

Yours truly,

F. H. CLEVELAND,
12 Garfield Place.

Bartlett

A CAREFUL STUDY OF OUR NURSERY STOCK AND PRICES WILL INTEREST YOU

Direct from Grower to Planter

Pears—(Continued)

Clapp's Favorite Pear

Worden-Seckel—This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. In size it is much larger than Seckel. It is shaped like Bartlett but is not as large. A tree of this beautiful pear is an object of beauty on the home ground when laden with beautiful specimens. Oct.

Flemish Beauty—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Sept and Oct.

Garber—One of the Japan Hybrids; larger than Kieffer; hardy, productive, early bearer; excellent for canning. September and October.

Win Medal at New Jersey Horticultural Society Show

Cape May Court House, N. J., Nov. 26, 1921

Kelly Bros. Nurseries, Dansville, N. Y.

Gentlemen:—Our order for trees arrived all O. K., have been inspected and found all right in every respect.

We have fifteen acres in Apple trees purchased from your nurseries and the first crop of Apples in 1920 were of such good quality that they were awarded the Bronze Medal for the "Best 25 Apples" in Cape May County, given by the New Jersey State Horticultural Society at the Horticultural Show held in the Chalfont Hotel, Atlantic City, December, 1920.

Very truly yours,
BETHEL & RICHARDSON.

Pears—(Continued)

Kieffer—Large to very large, skin yellow, with a light vermillion cheek; flesh brittle, very juicy, with a marked musky aroma; good quality. It is unfortunate that the merits of this fruit have been underestimated from the haste in which it is hurried to market in an immature condition, and often before it has attained the proper size. When allowed to hang upon the trees until the beginning of October, and then carefully ripened in a cool, dark room, there are few Pears which are more attractive. Combines extreme juiciness with a sprightly subacid flavor and the peculiar aroma of Bartlett. Fruit should be thinned. 90 per cent Kieffer and 10 per cent Le Conte should always be the arrangement, on account of pollenizing.

Lawrence — Trees healthy, hardy and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, buttery, and aromatic. One of the quality pears that has great merit for commercial orchards.

Le Conte—Undoubtedly another hybrid from the Chinese Sand Pear. Large, pyriform; smooth, pale yellow, quality good, juicy and pleasant. Tree remarkably vigorous, healthy and free from blight. A prolific bearer and profitable. Oct.

Beurre Bosc—Greatly esteemed. A large yellow pear; flesh white, rich and delicious; has long stem which allows it to sway in heavy winds without dropping. The tree is a slow grower, but most productive. Keeps until Christmas.

Beurre Bosc Pear

BEURRE BOSCO—THE QUALITY PEAR

The photograph above shows the general characteristics of this glorious extra large Pear. The long slender neck tapers to the stem and is covered all over with a deep russet yellow. The quality is superb; in fact, this Pear is conceded to be by far the finest flavored. The picking season is the latter part of October and at that time the fruit can be marketed at a handsome price. Further than this, if properly cared for this fruit will keep in perfect condition until the Holiday Season. No home garden is complete without this variety and commercially it is a money maker. We have the finest and best lot of Beurre Bosc Pear trees to offer this season that we have ever produced. You will make no mistake in planting this quality Pear.

Dwarf Pear Trees

The cultivation of Dwarf Pears is very profitable. The trees are low-headed and the fruit is easily handled and comes into bearing usually the second or third year. Pears are dwarfed by budding on Quince stock, and the trees should be planted three inches below the union. All varieties of Pear do not give good results as dwarfs. We recommend the following varieties to be good growers and bearers, and to give the best satisfaction as dwarfs:

Bartlett, Clapp's Favorite, Duchess, Flemish Beauty, Kieffer, Seckel. (For description of these varieties see Standard Pear.)

DWARF SECKEL

Prices of All Varieties of Dwarf Pear Trees

Our Nurseries Absolutely Free From San Jose Scale

It is an established fact that San Jose Scale has never been found in our nurseries. We have here three resident New York State Inspectors who look after our stock from seedling to freight car, and not once has this worst of insect pests made its appearance in our nurseries. We welcome the visits of the inspectors, because we know this helps to keep our stock free from disease. Ours is the only nursery center of any importance in the United States that is absolutely free from San Jose Scale.

Plum Trees

NO OTHER fruit tree, unless it is the cherry, will produce more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years but the supply still falls far short of the demand. In general, plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties.

Prices of All Varieties of Plum Trees

					Each	Ten	Hundred
Largest Size	2 Year	6 to 7 Feet	$\frac{3}{4}$ and up	XXX	\$.90	\$8.50	\$80.00
Medium Size	2 Year	5 to 6 Feet	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.85	8.00	75.00
Smaller Size	2 Year	4 to 5 Feet	$\frac{1}{2}$ to $\frac{5}{8}$	X	.80	7.50	70.00
Largest Size	1 Year	3 Feet and up	Sturdy Buds	XXX	.85	8.00	75.00

8 per cent Discount on all Cash Orders received on or before March 25th. After that date 3 per cent Discount on all Cash Orders.

EUROPEAN PLUMS

Bradshaw—A very large and fine early plum, dark violet red, juicy and good. erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. It ripens ten days to two weeks later than Abundance.

Fellembury Prune—Dark purple with a dark blue bloom; size medium; oval, pointed and tapering. Flesh juicy and delicious; fine for drying. In the West it is grown by the thousands of acres and shipped by the trainload to all markets of the world.

Geuil—Very large, bluish purple; flesh yellowish green, sweet. Tree hardy and rapid grower.

German Prune—A valuable Plum for dessert, but most esteemed for market and drying or preserving. Fruit long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices.

Lombard—Medium to large, roundish, oval, dark red, flesh yellow, juicy and pleasant flavor; hardy popular, nearly always producing a crop, a valuable commercial sort. August.

Monarch—Very large brilliant; bluish purple; flesh, pale golden green; juicy, abundant bearer and begins fruiting young. Free from rot; excellent for market. September.

Shipper's Pride—Large and handsome, dark purple; quality fine, juicy and sweet; excellent for canning. September.

Shropshire Damson—Large, amber color, juicy and sprightly; most desirable of the Damson class; productive and not liable to rot; good commercial sort. Sept.

Imperial Gage—Rather large; oval;

greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best plums. Middle of August.

Shropshire Damson

WE AIM TO GIVE YOU IN EVERY PURCHASE THE BEST YOUR MONEY CAN BUY

Direct from Grower to Planter

Plums (Continued)

German Prune

European Plums (Continued)

Reine Claude—Large, pale yellow, marked with red, excellent and of fine quality; good bearer; valuable for commercial purposes. Middle of September.

York State Prune is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple bluish; flesh yellow and delicious; freestone, ripening the last week in September. It originated in Dansville, N. Y.

JAPANESE PLUMS

Abundance—Fruit large, showy, beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness impossible to describe. Stone small and parts readily from flesh. For canning it is of greatest excellence. Its season is very early, ripening in advance of other plums, thus adding to its special value.

Burbank—When properly thinned, the fruit is very large, nearly round and bright, deep red; flesh a deep yellow, very sweet, meaty and quite firm, keeping and shipping finely. Tree hardy and vigorous, but sprawling in growth; needs close pruning; enormously productive. Burbank orchards have been very profitable up to date.

Red June—The best Japan plum, ripening before Abundance. Medium to large; deep vermilion-red, with handsome bloom; flesh light lemon-yellow, firm; moderately juicy; fine quality. Tree upright, spreading, vigorous and hardy; productive.

Satsuma—Large, globular, with sharp point. Color purple and red with bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small.

Wickson—A sturdy, upright grower; fruit remarkably handsome, deep, maroon-red, covered with white bloom; stone small; flesh fine texture, firm, sugary and delicious; excellent keeper and shipper.

October Purple—Originated by Burbank, who regarded it as one of the best introduced. Fruits on the old wood and frequently measures seven inches in circumference. Tree a strong, erect, grower, forming a shapely head.

Shiro—Medium size, yellow, and very sweet. The best quality of any of the Japan Plums. We have fruited it in Nursery rows and can recommend it highly for garden planting. Sept.

Sultan—A large, handsome Plum of purplish-crimson color; excellent for cooking and preserving. Keeps long and ships well.

Climax—Very large; deep, rich red; fine flavor; one of the earliest to ripen. Mr. Burbank regards this as one of his most valuable productions.

Our nursery stock has the reputation of being the **BEST** that can be grown, and it is our aim to keep it up to the standard in every way. **THE BEST IS ALWAYS THE CHEAPEST.** It is not what you pay, but what you get, that makes the bargain. Every purchase will prove to you the value of buying stock from us.

Small orders receive the same careful attention that we give the large—No order too big for us to handle with ease—none too small.

Quince Trees

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, farmer or any one having even a small garden. The Quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the winter is complete without the Quince. We recommend the following varieties:

Prices of All Varieties of Quince Trees

					Each	Ten	Hundred
Largest Size	2 Year	4 to 6 Feet	$\frac{5}{8}$ and up	XXX	\$.80	\$7.50	\$70.00
Medium Size	2 Year	3 to 4 Feet	$\frac{1}{2}$ to $\frac{5}{8}$	XX	.75	7.00	65.00
Smaller Size	2 Year	2 to 3 Feet	$\frac{3}{8}$ to $\frac{1}{2}$	X	.70	6.50	60.00
Largest Size	1 Year	3 Feet and up	Sturdy Buds	XXX	.75	7.00	65.00

8 per cent Discount on all Cash Orders received on or before March 25th. After that date 3 per cent Discount on all Cash Orders.

Orange Quince

Champion—Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect; bears abundantly while young; flesh cooks as tender as an apple and without hard spots and cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. One of the most valuable.

Orange—Popular, extensively cultivated, reliable and satisfactory. The name was given in an attempt to do justice to its most delicious flavor. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking. Firm, will stand handling and shipping.

Rea's Mammoth—Large, rich golden yellow; flesh cooks as tender as the apple and without hard spots or cores, flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. Sure to ripen even in northern latitude. Very hardy and productive. We regard it the best of all quinces. October.

Bourgeat—Bears at an early age, producing large crops of exceedingly large and handsome fruit, of a rich golden color. While it ripens soon after the Orange it keeps until midwinter, or it is ready to use at once on maturity. It has proved to be free from leaf blight, the leaves keeping green until killed by frost.

Meech's Prolific—The most prolific of all known varieties; ripens between the Orange and the Champion. Bears very early, usually a full crop at three years; quality unsurpassed and size large.

"You'll Never Regret Planting Kelly Trees"

Apricots

This is a rich, delicious fruit, coming between Cherries and Peaches. It is very much like the Peach in outward appearance but like the Plum in quality and texture. The Apricot ripens about a month or more before the best early peaches come in, which explains the reason for the great demand and prevailing high prices. It should be planted in deep, rich soil; and care should be taken to know that the sub-soil as well as the top-soil is dry.

Aside from its value as a fresh fruit, the Apricot has a fixed place on the list of fruits for canning and drying, for which purposes vast quantities are used every year. There is always a market for Apricots and the planter should have no fear of over-production. Our stock of Apricots for this season is exceptionally fine and we make a very attractive price on them.

Prices of All Varieties of Apricot Trees

					Each	Ten	Hundred
Largest Size	1 Year	5 to 6 Feet	9-16 and up	XXX	\$1.80	\$7.50	70.00
Medium Size	1 Year	4 to 5 Feet	7-16 to 9-16	XX	.75	7.00	65.00
Smaller Size	1 Year	3 to 4 Feet	5-16 to 7-16	X	.70	6.50	60.00

Alexis—Very hardy; and abundant bearer; yellow, with red cheek; large; slightly acid, rich and luscious.

Budd—Medium to large; light orange with blush on sunny side; flesh sweet, juicy with flavor of the peach; hardy and productive.

Harris—A hardy English sort. Medium size; oblong orange; good quality; very early. The best variety for Eastern culture.

Alexander—Fruit yellow, flecked with red, very beautiful and delicious. July.

Moorpark—One of the largest, orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Gibb—Tree hardy, grows symmetrical, productive. Fruit medium yellowish, sub-acid, juicy and rich. The best early variety ripening soon after strawberries.

“Kelly Trees Produce Quality Fruit”

Win First Award at New England Fruit Show

WILLIAM E. PUTNAM
159 DEVONSHIRE STREET
BOSTON, MASS.

November 25, 1921.

Kelly Bros. Nurseries, Dansville, N. Y.

Dear Sirs:—You may be interested to know that I have received First Award for the best box of Baldwin Apples at the New England Fruit Show held at Concord, N. H., Nov. 4-8, 1921. I have been planting Kelly trees for a long time on my farm at Hancock, N. H., and these Baldwin Apples were grown on trees received from you.

A number of orchardists in my county have purchased of you and their trees have always come into bearing True to Name, and the trees I have received from you have always arrived in good condition and have been fully up to my expectations. I have so far had Baldwin, McIntosh and Wealthy begin fruiting and the trees have been absolutely True to Name.

I am intending to plant more trees next year and shall, of course, order from you.

Very truly yours,
WILLIAM E. PUTNAM.

Nut Trees

The necessity for the importation of large quantities of nuts each year has awakened American agriculturists to the possibilities in producing nuts. Oftentimes the trees will thrive on soil not adapted to profitable fruit growing.

Black Walnut—This species is a common and stately forest tree in the middle and western states; grows from forty to sixty feet high; has an open, spreading head and is rapid in growth; produces large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. **Trees 5 to 6 ft., \$1.00 each. 4 to 5 ft., 75c each.**

American Sweet Chestnut—This is the well-known native variety with which nearly everyone is familiar. It is a stately tree, attaining great height when mature. It is beautifully symmetrical and when in blossom is as handsome as a tree can be. It bears a nut of good quality and seldom fails to produce a good crop. Aside from their crop value, all the Chestnuts are specially desirable for shade.

purposes and for ornamental planting. **Trees 4 to 5 ft. in height, 75c each, \$7.00 per ten.**

English Walnut—A fine, lofty-growing tree, with handsome spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. **Trees 3 to 4 ft., \$1.50 each.**

Chestnut, Spanish—A handsome round headed tree, producing abundantly, very large nuts that find a ready market at good prices. **Price of Spanish Chestnut trees, 4 to 5 ft., \$1.00 each.**

Butternut—A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel. **Price of Butternut trees, 4 to 5 ft., 75c each.**

UPLAND GROWN TREES

Give Satisfaction

Results are what you want when you plant fruit trees, whether it be in the commercial orchard or in the home garden—and in order to get results you must first of all have healthy, hardy trees. These can only be produced by being propagated in a climate that is suitable and on soil that is especially adapted to the making of strong, well rooted trees. Our climate here in Western New York, with cold but not too severe winters, is especially favorable to the proper maturing of trees. It hardens and ripens the wood well. We do not get the rank, spongy growth that is sometimes produced in the South and West and which is most undesirable.

We plant our Seedlings on upland ground where there is good air drainage, and thus are sure that the trees will be perfectly hardy and absolutely free from injury of any kind. The wonderful fertility of our upland soil alone enables us to produce trees of great vigor and of uniform development. We get the heavy root system with plenty of fibrous feeding roots by frequent, careful and thorough cultivation. The results of our efforts are trees that are well grown, straight, properly shaped and with well distributed branches. We allow our stock to stand in the nursery row a sufficient length of time to permit of its being fully matured and perfectly dormant before digging. This is most important. Our trees are carefully dug so that all the vigor is retained and the roots uninjured. Thus, they will stand transplanting with perfect safety and without hindrance to their growth. Most of the trouble with unprofitable orchards arises from the fact that inferior or diseased trees are planted. Our trees are absolutely free from all infectious diseases, the San Jose Scale or other pests, and are noted for their excellent physical condition. You will make no mistake when you plant Kelly Bros. UPLAND GROWN TREES.

Direct from Grower to Planter

Special Bargains in Fruit Trees

Many planters prefer to plant the smaller size trees as it reduces the cost of investment. In all cases they report success in planting this grade as the fibers of the roots are small and readily adhere to the ground and make a rapid and very satisfactory growth the first year. A few buyers of fruit trees have an idea that the smaller size trees are poor trees and are not fit to plant. This is a mistake as each one of our smaller size trees is a good, clean, straight healthy little tree and is first class in every respect according to grade. These small trees are well rooted and mature, and we recommend them most highly to the planter. We have a good stock of Apple, Peach, Pear, Cherry and Plum and offer them at these special low prices:

Apples

WE know that healthy trees, free from disease and absolutely true to name are the only trees a nurseryman can deliver and remain long in business. We earnestly request your most searching inquiry as to our reputation in this respect.

Grapes

Because of their adaptability to any place where there is a bit of soil, grapes are often a source of considerable profit. In fact, some fruit growers say that if you can plant only one fruit, let that be grapes. They require little care and as a rule will produce most abundantly. Rocky hillsides on which no other fruit would thrive, will produce wonderful crops of grapes and show profits that will overshadow any other part of the farm. Good grapes command high prices and will find a ready market in any locality. We have the following varieties in our stock:

Prices of Grapes, 2 Year No. 1 Vines

2 Year No. 1

Each	Ten	Hundred
.30	\$2.50	\$20.00

Brighton—A large, delicious, sweet red Grape; vine thrifty and a strong grower; flesh sweet, tender and very juicy. Best of all large red Grapes.

Campbell's Early—Black, with purple bloom; bunch and berries large. Juicy, with rich, sweet flavor; almost seedless. Hardy and of vigorous growth. Fruit hangs on vines sound and perfect for ten weeks or more after ripening.

Agawam—Good red variety; flesh tender and juicy, good bearer. Ripens with Concord.

Martha—Bunches and berries of medium size, greenish white, with a thin bloom; flesh tender, with very little pulp, juicy, sweet and rich, hardy and productive. Ripens with Concord.

Diamond White—The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem. Vine like Concord in growth, hardness and foliage.

Salem (Roger's No. 53)—A strong, vigorous vine; berries large, Catawba color; thin skin, free from hard pulp; sweet and sprightly; ripens first of September.

Catawba—Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat

pulpy, with rich vinous flavor, of best quality for both table and wine.

Champion—This is an extra early black grape. Bunch medium to large and compact. Berries adhering to the stem better than many other varieties. Skin thick, flesh sweet, juicy pulpy and good flavor. Vine a rank, vigorous grower. Perfectly hardy and very productive.

On account of its earliness always sells for high price in any market.

Wyoming—Vines very hardy, healthy and robust, with thick, leathery foliage; color of berry similar to Delaware, but brighter, being one of the most beautiful of the amber or red Grapes, and in size nearly double that of the Delaware flesh tender, juicy, sweet, with a strong native aroma. Ripens before Delaware. Best

early red for market.

Ives—Bunch medium to large, compact; often shouldered, berries medium; dark purple, sweet and good. Should hang on the vines some time after coloring before they are at their best.

Eaton—Bunch large, compact. Berries very large, nearly black with blue bloom. Skin thick. Quality good. Large showy grape. Season medium. One of the most showy grapes grown.

Woodruff Red—Handsome light red grape of good quality. Ripens with Delaware, keeps long and a good shipper. Very hardy and healthy, and a good cropper. One of the best red market grapes.

Concord

"You'll Never Regret Planting Kelly Trees"

Direct from Grower to Planter

Grapes (Continued)

Concord—The well-known black grape. Can always be depended on to fruit heavily. Succeeds over a large extent of country. Popular for market.

Delaware — One of the finest Grapes. Bunches small, compact, shouldered; berries rather small, round; skin thin, light red; flesh juicy, with an exceedingly sweet and delicious flavor.

• **Niagara White** — Popular everywhere. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections. Largely planted by vineyardists.

Moore's Early—Bunch and berry large, with a blue bloom; quality better than Concord. Its size and earliness render it desirable.

Pocklington—Berries large, golden yellow; sweet and tender with little pulp. Thoroughly hardy and healthy. Ripens after Concord.

Worden—Possesses most of the good qualities of Concord and lacks some of the bad ones. Differs chiefly in having larger berries and bunches. Better in quality and five to ten days earlier.

Niagara

He Has Bought Nursery Stock For Fifty Years

Boston, Mass., May 1, 1922.

Kelly Brothers' Nurseries, Dansville, N. Y.

Gentlemen:—I received your letter saying that you could not fill my last small order. It is clearly through your own doings that this has occurred.

Fifty years ago I used to visit Rochester, Geneva and other nursery centers to buy nursery stock. They were all good people to deal with and at times I made some heavy purchases, but in all my dealings I have never met any people who seemed so well to exemplify the essentials of sound and successful business as you people. You like and insist upon having good stock, and you follow this up by also insisting that the receivers of your plants should treat them with that good sense and care which alone can insure a successful and profitable result. Following up these lines, builds up a patronage that takes your entire output and clamors for more.

Today you show added good sense by not attempting to fill incoming orders with stock grown by others, but simply stop until another season.

Please accept my best wishes and believe me

Sincerely yours,

JAMES H. BOWDITCH, 903 Tremont Bldg.

CUT OUT THE MIDDLEMEN IN BUYING NURSERY STOCK. SAVE THE BIG MIDDLE PROFIT YOURSELF

Raspberries

A ready market can always be found for raspberries. When well cared for they are sure to return a good profit. A patch of raspberries should be renewed about once in five years, as by that time the quality of the berries deteriorates and the fruit becomes small. The plants should be well manured and cultivated at frequent intervals. We offer the following varieties of

Black Raspberries

Prices of Strong, Healthy Plants

Twenty-five	Hundred	Thousand
\$1.50	\$4.50	\$35.00

GREGG

Plum Farmer (Black)—This very large and productive black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens very early and quickly. The fruit is enormously large.

Kansas (Black)—One of the best of the early ripening Blackcaps; the berries are large and showy. Canes are of strong growth, very hardy and prolific, with tough, healthy, clean foliage.

Diamond (Black)—Has shown itself to be one of the most popular black Raspberries. It is sweeter than most varieties, more pulpy, and contains fewer seeds; at the same time it is firm and an A No. 1 shipper. It is a grand berry for drying, the dried berries being a jet black and containing all the richness, fine flavor and sweetness of the fresh fruit. The berries are large and the quality is good.

Cumberland (Black)—The largest of all Blackcaps. A healthy, vigorous grower throwing up stout, stocky well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality good; keeps and ships as well as any of the blacks. It is a profitable market variety.

Gregg (Black)—Of great size, of fine quality; very productive and hardy. It takes the same position among Blackcaps as Cuthbert among the red sorts. No one can afford to be without it.

Ohio (Black)—A standard early berry. Very productive. Fills up quarts very fast, and is easy to pick. Fine quality; very hardy.

Conrath (Early Black)—In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give it a foremost rank.

Every One Alive

Allentown, Pa.
June 5, 1920.

Kelly Bros. Wholesale Nurseries,
Dansville, N. Y.

Gentlemen:—I received my trees and raspberry plants in good order and have not lost a single one. They were the finest specimens I ever bought from any nurserymen. The trees are as you advertised and if I live until next year I shall give you another good order.

I certainly will be glad to tell all of my neighbors and friends regarding the extra fine stock I received from you.

Yours truly,
ARTHUR MOYER,
City View Farm, R. F. D. 2.

NOT WHAT WE CLAIM, BUT WHAT WE ACTUALLY DO, COUNTS

Direct from Grower to Planter

Red Raspberries

CUTHBERT

Prices of Strong, Healthy Plants

Twenty-five	Hundred	Thousand
\$1.50	\$4.50	\$35.00

Cuthbert (Red)—Medium to large; crimson; hardy and prolific. The most reliable sort. Fine for market or garden. Succeeds well over a large range of territory both north and south. Sufficiently firm so that the fruit ships well and of such good quality as to make it one of the best for home use.

Loudon (Red)—The Loudon New Red Raspberry ripens with the earliest and hangs late. It is as hardy as the Turner, and is of superior quality. Very productive and a good shipper.

King (Red)—Pronounced the best early red raspberry by many of the leading horticulturist. Plant a strong grower, very hardy and productive. Berry is firm, a good shipper; large size; beautiful bright scarlet color; ripens with the earliest.

Marlboro (Red)—A very profitable, early market variety with large, light crimson fruits, of good size and flavor. The crop covers a period of four or five weeks in ripening.

St. Regis (Everbearing)—A new acquisition to the Red Raspberry family. Fruit commences to ripen with the earliest and continues on young canes until October. Color bright crimson. Large size. Flesh firm and meaty. Good shipper. Very prolific. Every grower should test it.

Ruby (Red)—Seedling of the Marlboro, originated at Marlboro, N. Y., has fruited for seven years. Ripens with the earliest, continues a long season. Fruit large, bright red, exceedingly firm, excellent quality. Strong grower, large hardy canes.

Purple and Yellow Raspberries

Prices of Strong, Healthy Plants

Twenty-five	Hundred	Thousand
\$1.50	\$4.50	\$35.00

Columbian Purple—A strong grower, unexcelled for productiveness and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

Golden Queen (Yellow)—Very large, hardy, vigorous and productive. No garden should be without it. It is a seedling of the Cuthbert. Canes hardy, of strongest growth. Should be in every home garden.

Buy of Us and Cut Out the Middlemen's Profit—It is a Big Saving

Currants

No other bush fruit ripens as early as the currant. It is hardy and will produce heavily. Careful cultivation will practically double production. It is best to plant the bushes in rows about 4 feet apart. The ground should be kept free of weeds and the bushes carefully pruned each spring. The following varieties have been found to be the best for commercial purposes:

Prices of All Varieties of Currants

	Each	Ten	Hundred
2 Year No. 1 Strong Bushes	.30	\$2.50	\$22.50
8 per cent Discount on all Cash Orders received on or before March 25th. After that date 3 per cent Discount on all Cash Orders.			

Wilder

Fay's Prolific (Red)—A cross between Cherry and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry. Highly commended by those who have seen or had experience with it.

Cherry (Red)—Fruit of very large size and very tart; plant vigorous, but not as productive as some of the other varieties.

Perfection—Large; red; fine. It is one of the most productive currants known, and quality superior to anything on the market. The flavor is rich, mild, sub-acid, with plenty of pulp and few seeds.

White Grape—Very large; yellowish white, sweet or very mild, acid; excellent quality and valuable for the table. The finest of the white sorts.

Wilder—A remarkable new variety both for table and market; strong grower, enormously productive; bunch and berry very large; bright red and of highest sub-acid quality, making it unequalled for the table, cooking or market.

Diploma—Received World's Fair Gold Medal as the largest and best Currant. Bush is a vigorous grower. Fruit is of excellent appearance, both clusters and berries being very large. Red, medium late, good quality and very solid.

ORDER EARLY

100 FRUIT TREES ON EVERY FARM

We clip from the Rural New Yorker of Dec. 28, 1918, the following article which is of especial interest to farmers:

100 Fruit Trees on Every Farm—That is the latest slogan, and we call it a good one. Of all the places in the world a farm should be headquarters for vegetables and fruit. A farm without a garden or orchard is not a full home, and cannot become an attractive place for civilized people to live. We have heard people make a fair argument against working a farm garden, but we never heard any argument worth considering against a farm orchard. It requires but little judgment and skill to plant a fruit tree and carry it to bearing age. This does not refer to expert care, but to good trees which bear good fruit. Apple, peach, pear, plum, cherry and quince. Give us one sound reason why there should not be 100 trees suitably divided among these fruits on your farm. We shall keep right at this until every farm worthy of the name has its 100 fruit trees. A long job, you may say, but that makes it all the better. We shall be glad to give advice about varieties for your section and methods of planting and care—but at any rate we must have 100 fruit trees on every farm.

Direct from Grower to Planter

Blackberries

Fruit growers as a rule regard the blackberry as the most profitable of the several varieties of berries. Blackberries thrive best on fertile loam, although clay and sandy soils also produce good results. The rows should be about six feet apart with each plant approximately two feet apart in the row. We have selected the following varieties as the best.

Prices of All Varieties of Blackberries

	Twenty-five	Hundred	Thousand
Strong well rooted Plants	\$2.00	\$6.00	\$45.00

8 per cent Discount on all Cash Orders received on or before March 25th. After that date 3 per cent Discount on all Cash Orders.

Erie

Erie—Fruit very large, excellent quality. There is no other berry that rivals it in combining hardiness, large size, earliness and productiveness.

Snyder—Abundant bearer; berries of medium size; fruit ripens early and is sweet and juicy. Canes very hardy even in extremely cold climates. You won't go wrong in planting this variety, as it will be found most satisfactory both as a home and market berry.

Blower—An upright, mammoth grower; very hardy and enormously productive; large, glossy, firm and luscious berry, extra good everywhere. Fruit may be picked continuously from July to October, ripening in great quantities in August and in abundance in September. Berries very large and of good quality.

Rathbun—A strong, erect grower with strong stem, branching freely; will root from tip of branches like a raspberry. Hardy, having endured twenty degrees below zero and produced a good crop. Forms a neat, compact bush, four to five feet high, producing its immense fruit abundantly. Fruit is sweet and luscious without hard core, of extra high flavor, jet black, small seeds, firm enough to ship and handle well. Very large size.

Wilson's Early—Very large size, oblong oval, black, quite firm, rich, sweet and good; ripens early and matures its fruit rapidly; retains its color well after picking.

Eldorado—The hardiest and sweetest blackberry. Very vigorous and hardy. Berries are very large, jet black, borne in large clusters and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days.

Lawton—The well-known market variety. Large, oval, black, juicy, sweet.

Mersereau—Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra-size berries, which are brilliant black and retain color; extra quality sweet, rich and melting, without core. Ripens very early.

WELL PLEASED

Sparta, Mich., Feb. 22, 1922.

Kelly Brothers' Nurseries.

Gentlemen:—I was undecided until now about setting any trees this Spring but I am sending you the order. Have been well pleased with the trees from your nurseries in the past. Many of them are now bearing although very young and all are True to Name. Your prices are right.

F. L. BESNETT,

MOST VIGOROUS

Allentown, Pa., April 20, 1922.

Kelly Brothers' Nurseries.

Gentlemen:—I feel so proud of the nice trees that you people sent me that I must let you know about it. They are the most vigorous trees and have the greatest root systems of any that I have ever seen. You can feel assured of my future orders for trees.

MILTON T. GEORGE,
240 North 8th St.

SEE OUR SPECIAL COLLECTIONS ON PAGE 56

Strawberries

Being practically the first fruit of its kind on the market, strawberries are ready sellers and can be grown at a good profit. They will thrive in any good garden soil. Plants should be set one foot apart in the row, with the rows two feet apart. Beds should be renewed every third year, as it has been found that more than two crops to a planting are not profitable.

Prices on All Varieties of Strawberries

Except Fall Bearing	Twenty-five	Hundred	Thousand
	\$1.00	\$2.50	\$12.00

NOTE—Strawberry plants are always shipped by express separate from balance of order. About May 1st.

Corsican

Corsican—It is a great strawberry; it is the biggest berry; it is the brightest and best in color; it is a great yielder and producer; and the foliage is exceedingly vigorous and leathery resisting fungus, drought, weed and even neglect of cultivation.

Brandywine—A good market berry; medium to large; dark scarlet, firm and somewhat acid; a good bearer and does well in clay soil.

Senator Dunlap—A sturdy plant and heavy cropper of best quality berries, with clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular with slight neck. In color, they are glossy crimson, with the meat firm and solid, deep crimson throughout and good in quality.

Wilson—The best berry for canning. This is an old well thought of variety that has always given satisfaction. One of the very best berries for flavor and quality. We recommend this variety to you.

Jessie—Especially valuable for garden. Large, firm and solid; excellent quality; productive.

Marshall—Very large, dark crimson; firm and of excellent quality; plant vigorous and productive; one of the best varieties for home use or market.

Sample—Late, of large size and yields enormous quantities of high quality bright red berries. Standard shipping variety.

Haverland—Exceedingly productive; fruit large and very fine; one of the most popular and well tested varieties; withstands drouth better than most kinds; color light, season early. Considered throughout the United States as a money-maker in almost any climate.

Michel's Early—One of the earliest varieties grown. The plant is a very robust grower, strong and healthy; one of the best of the early fertilizers, as it blossoms early and late. Fruit is of medium size and good quality.

Fall Bearing Strawberries

Prices	TWENTY-FIVE	HUNDRED
	\$2.50	\$7.50

Productive—This is the strongest growing plant of all the Fall-bearing Strawberries. It is a seedling of the Autumn and Pan-American. The plants are very large and heavy-rooted, producing a phenomenal crop of medium to large fruits. The young plants are produced in good quantities. This variety has very prominent seeds, is very firm and a good shipper.

Superb—The plants of Superb are of good, average size, are strong growers and stand the winters best of all kinds tested. The fruit is very large, roundish, dark-colored, glossy, attractive and smooth. It has the finest flavor.

Kelly Brothers Wholesale Nurseries,
Dansville, N. Y.

Gentlemen:—The last box of Apple trees has arrived all C. K. Stock in fine condition. Will come again.

Yours very truly,

L. C. STEPHENS.

Gooseberries

The gooseberry is gaining in popularity every year. It has been found to be very profitable in the home market and grows readily in any good soil. The plants bear abundantly and require little care. We have the following standard varieties:

Downing — Largest and best of all native American varieties. This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. Enormously productive.

Industry — An English variety, producing exceedingly large fruit of dark red color and delicious quality. Highly recommended both in this country and in Europe.

Houghton — A medium sized American variety, which bears abundant and regular crops, and never mildews; fruit smooth, red, tender and very good; valuable.

Red Jacket — An American Seedling of large size;

smooth, prolific and hardy, of best quality. A wonderful cropper.

Downing Gooseberry

Prices for Gooseberries, 2 Year Strong Bushes

No. 1	Each	Ten	Hundred
	.40	\$3.50	\$30.00

Garden Roots

RHUBARB (Pie Plant)

Rhubarb is the earliest available material in the Spring for fresh pies and sauce. Every family should have a few Rhubarb roots for there is nothing in the fruit or vegetable line that is so beneficial to the human system in the Spring months. Set plants 12 to 18 inches apart in rows.

Linnaeus — Large, early, tender and fine.

Early Scarlet — Rather small, early and good.

Prices, strong 2 year plants, 20c each; \$1.50 per 10; \$10.00 per 100

ASPARAGUS

Conover's Colossal — A standard variety of large size, tender and excellent quality. This variety is known everywhere. You will get good satisfaction out of a bed of asparagus.

Palmetto — A very early variety, even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Price, strong, healthy plants, \$1.00 per 25, \$3.00 per 100, \$15.00 per 1000

HORSE RADISH

Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment.

Price, strong sets, 50 cents per 10, \$3.00 per 100, \$15.00 per 1000

OUR BUSINESS PLATFORM CONTAINS BUT ONE PLANK—A SQUARE DEAL FOR EVERYONE

Rhubarb Roots

Asparagus Roots

Ornamental Department

ALL-KEPT grounds, which necessarily include fine shade trees, ornamental, flowering shrubs, vines and roses, are naturally a great source of pleasure to a property owner. They also greatly enhance the value of property. A relatively small amount invested in ornamentals will bring a big return should you wish to dispose of your property. Nor does it require a big outlay of money to make your property beautiful by such ornamentation. The trees and shrubs, etc., of course should not be planted haphazardly. If you do not know just how to go about the matter you can easily obtain competent advice. We take the same care with our ornamental stock that we do with our fruit stock. That means that it is the best.

Shade Trees

Carolina Poplar

American Linden (Basswood)—A rapid growing large sized beautiful native tree with large shining cordate leaves, stately. Growing 60 to 80 feet tall. Its beautiful white flowers appear in July and yield a delicate perfume. Valuable for its beautiful white wood. Price, 6 to 8 ft., \$1.50 each. 8 to 10 ft., \$2.00 each.

Kilmarnock Weeping Willow—It forms without any trimming, an exceedingly graceful tree with large, glossy foliage and perfect umbrella-shaped head; unique in form. Grows vigorous and will thrive in any soil. One of the finest of this class of trees; especially suited for lawn and for cemetery planting. Price, 5 to 6 ft., \$2.00 each, \$17.50 for 10.

Poplar Carolina—A very rapid growing soft-wooded tree, resembling the Cottonwood somewhat, but has a larger leaf and much thicker and more spreading top, denser and heavier foliage. It is being extensively planted in the cities and towns throughout the United States on account of its rapid growth, its symmetry and ability to endure gas and smoke. Perfectly hardy. It is free from cotton which is so disagreeable in the Cottonwood. Price, 6 to 8 feet, 40c each; \$3.50 for 10; \$30.00 per 100. 8 to 10 feet, 50c each; \$4.50 per 10; \$35.00 per 100. 10 to 12 feet, 75c each; \$6.50 per 10; \$50.00 per 100.

Purple-Leaved Beech—Beautiful purple leaved foliage tree. Deep purple in spring changing to a crimson and again to a dull green in fall. One of the most effective lawn trees we have. Price, 2 to 3 ft., \$2.50 each.

American Elm—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. Price, 6 to 8 ft., \$1.00 each; \$8.00 per 10. 8 to 10 ft., \$1.25 each; \$10.00 per 10.

Poplar Lombardy—A tall spire-like tree, used for screens and formal planting. It is fast-growing, distinctly ornamental and beautiful. Price, 8 to 10 ft., 75c each; \$6.50 per 10, \$40.00 per 100.

Mountain Ash—A handsome small tree with pinnate foliage and loaded in late summer with big clusters of bright red berries. Price, 5 to 6 ft., \$1.25 each. 8 to 10 ft., \$1.50.

Tulip Tree (Whitewood)—One of the grandest of our native trees, of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves and beautiful, tulip-like flowers; allied to the Magnolia. Price, 8 to 10 ft., \$1.50 each.

Tea's Weeping Mulberry—The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground. Price, 5 ft., \$2.50 each.

A GUARANTEE IS A GUARANTEE WITH US. TRY US AND SEE FOR YOURSELF

Direct from Grower to Planter

Shade Trees (Continued)

Norway Maple

Catalpa Bungei (Umbrella Catalpa)—Grafted on stems six to eight feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green, lying like shingles on a roof; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery planting. **Price, 6 to 8 feet, \$2.00 each. 8 to 10 feet, \$2.75.**

Catalpa Speciosa—One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possessing wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers, tinged with violet and dotted with purple and yellow. Very ornamental and useful. **Price, 6 to 8 feet, 50c each, \$4.50 per 10. 8 to 10 feet, 75c each; \$7.00 per 10.**

Horse Chestnut, White Flowering—The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior. **Price, 5 to 6 ft., \$1.50 each, \$12.00 per 10.**

Norway Maple—The most beautiful of all shade trees. Perfect in form with deep green foliage. It is a vigorous grower, free from disease, and holds its color until late in the fall. Growth is fast. Branches and foliage are thick and compact. For lining the sides of lanes and roads, to protect the house from sun and weather, for shade, for beauty and satisfaction, it cannot be excelled. We have an extra fine stock of good straight trees to offer. **Price, 8 to 10 feet, \$2.00 each; \$17.50 per 10. 10 to 12 feet \$2.50 each; \$22.50 per 10.**

Silver-Leaved Maple—Foliage bright green above, silvery underneath. Growth is faster than that of any other maple. Form of growth spreading. Grows very large. **Price, 8 to 10 feet, 85c each; 10 for \$7.50.**

Bechtel's Flowering Crab—Makes a medium sized tree; perfectly hardy, succeeds well in all soils not extremely wet. When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance. The only sweet-scented Double Crab. **Price, 3 to 4 feet, \$1.00 each; \$7.50 per 10.**

American Elm

YOU WILL DO YOUR FRIENDS A SERVICE BY TELLING THEM ABOUT OUR VALUES

Shade Trees (Continued)

Cut-Leaved Weeping Birch

Cut-Leaved Weeping Birch—One of the most elegant of all weeping or pendulous trees. Its tall, slender, yet vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. Price 5 to 6 ft., \$2.00 each. 6 to 8 ft., \$2.50 each.

Oriental Plane—Leaves heart-shaped at base, deeply cut. Is among our tallest trees, growing rapidly into massive proportions. Hardy and free from disease. It does well in cities and near the seashore and is not affected by insects. Price, 8 to 10 feet, \$1.00 each; \$8.00 for 10.

Camperdown Weeping Elm (Grafted)—Its vigorous irregular branches, which have a uniform weeping habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large, glossy, dark green. A strong, vigorous grower. The finest weeping elm and one of the best weeping trees. Price, 2 year heads, \$3.00 each.

Ash-Leaved Maple (Box Elder)—A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive. Price, 6 to 8 feet, \$1.00 each; \$8.00 for 10.

Wier's Cut-Leaved Maple (*Acer saccharinum Wieri*)—A beautiful form, with deeply cleft and divided leaves; branches pendulous, often sweeping the ground. Price, 6 to 8 feet, \$1.00 each; \$8.00 for 10.

Hardy Climbing Vines

Chinese Purple Wistaria—A very beautiful popular species, with racemes of pale lilac flowers borne in great profusion in May. An exceedingly graceful climber for training on porches or arbors. The stems grow quite large, climb high and twine tightly. Their growth is very rapid. Price, 60c each.

Chinese White Wistaria—In all respects similar to the species, except in color of the flowers, which are white and borne in great profusion, making a splendid show. Makes a very pretty contrast to the species with its blue flowers. Price, 60c each.

Chinese Matrimony Vine—Vigorous and hardy climber, flowers bright purple, succeeded by scarlet berries, nearly one inch long. Excellent for trellises. 60c each.

Ampelopsis Veitchii (Boston Ivy)—For covering buildings of brick and stone; clings tightly to the smoothest surface. Bright green leaves, changing to brilliant colorings in fall. 60c each.

Clematis Henryii—Single; the finest white Clematis; very large, fine flowers; grows rapidly; blooms freely during summer and autumn. \$1.00 each.

Clematis Jackmanni—Single. Very large; deep purple; forms a perfect mass of richest bloom. \$1.00 each.

Clematis Paniculata (Sweet-scented Japan Clematis)—The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom. Price, 60c each.

Dutchman's Pipe (Birtworth)—Large, heart-shaped leaves and quaint, pipe-shaped green flowers. Price, \$1.50 each.

Hall's Japan Honeysuckle—Flowers white, bloom from July until winter. Fine climber. 60c each.

Chinese Purple Wistaria

PAIR OF CATALPA BUNGEII

Catalpa Bungeii. (Umbrella Catalpa)—For delivery this season we have a very fine stock of these most desirable ornamental trees. They are grafted on stems 6 to 8 feet and 8 to 10 feet high and make excellent umbrella-shaped tops without pruning. The leaves are large, glossy, heart-shaped, deep green, lying like shingles on a roof. Every lawn should have one or two of these unique trees. Fine for park or cemetery planting. Note our very special prices for these trees.

Catalpa Bungeii	6 to 8 Feet	\$2.00 each	\$17.50 per 10
Catalpa Bungeii	8 to 10 Feet	\$2.75 each	\$25.00 per 10

Evergreen Trees and Shrubs

1. White Fir 2. Norway Spruce 3. American Arbor Vitae 4. Balsam Fir
5. Colorado Green Spruce 6. Nordman's Fir

American Arbor Vitae—Much used for hedges, screens, singly on lawns, and in tubs for porches, etc. It is a handsome little tree, and if allowed to grow naturally will be quite tall and pyramid-shaped. Can be trimmed and kept in any form and height. In the summer the foliage is bright green above, yellowish beneath, and when winter comes this changes to the richest tones of brown and bronze. Price, 18 to 24 in., \$1.00 each; \$9.00 for 10. 2 to 3 ft., \$1.25 each; \$10.00 for 10.

Balsam Fir (American Silver)—A very regular symmetrical tree, assuming the conical form. Leaves dark green above, silvery beneath. Price, 2 to 3 ft., \$2.00 each; \$17.50 for 10.

Black Hill Spruce—Somewhat similar and closely related to Norway Spruce but more compact and bushy, hardiest of all Spruces. A native of the Black Hills of South Dakota. It has been fully tested in all parts of the country and found very satisfactory. Excellent for planting as single specimen and in hedges. Foliage varies from green to bluish tint. Price, 2 to 3 ft., \$1.25 each; \$10.00 per 10; \$90.00 per 100. 3 to 4 ft., \$1.50 each, \$12.50 per 10; \$100.00 per 100.

Colorado Green Spruce—It is extremely hardy and endures well the sun and drying winds. Very compact and symmetrical. Color a beautiful green which it retains throughout the entire year. Price, 3 to 4 ft., \$2.00 each.

Norway Spruce—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich. As it gets age has fine, graceful, pendulous branches. It is exceedingly picturesque and beautiful. Very popular and should be largely planted. One of the best evergreens for hedges. Price, 2 to 3 ft., \$1.00 each; \$9.00 per ten; \$80.00 per hundred. 3 to 4 ft., \$1.25 each; \$10.00 per ten; \$90.00 per hundred. 4 to 5 ft., \$1.50 each; \$12.50 per ten; \$100.00 per hundred.

Nordman's Fir—A symmetrical and imposing tree. The warm green of the young shoots contrasts finely with the rich, deep color of the old foliage—the best of the Silver Firs. Price, 2 to 3 feet, \$4.00 each; \$35.00 for 10.

Irish Juniper—Junipers are handsome evergreens. Always neat and clean. This variety grows exceptionally slim and column-like. The branches grow almost straight up, and a 7 or 8 foot tree will not be more than a foot and a half thick. Price, 2-3 ft., \$1.25 each; \$10.00 for 10.

White Fir (Concolor)—A very picturesque Colorado species. Long, leathery leaves, with glaucous tinge when young, becoming pale green with age. Branches arranged in horizontal whorls. A grand tree, making splendid specimens. Price, 2 to 3 ft., \$2.00 each; \$17.00 for 10.

YOUR FIRST ORDER WILL CONVINCE YOU OF OUR UNPARALLELED VALUES

Direct from Grower to Planter

Evergreen Trees and Shrubs—(Continued)

Boxwood—This old-fashioned variety is a native of England where it has been grown for centuries. Its neat, dense, waxy foliage has secured many admirers. They are well adapted to small places and can be used with splendid effect as shrubs for the lawn. For decorative purposes both summer and winter. Price, 18 to 24 inches, \$2.00 each.

Austrian Pine—A rapid growing species from the mountains of the Austrian Empire. It has very stout branches, with long, rigid bluish green foliage, and presents a massive appearance in contrast with other conifers. It is very hardy, not especially particular in regard to soils, and valuable for windbreaks, etc. Price, 2 to 3 ft., \$1.25 each, \$10.00 for 10.

Scotch Pine—A rapid-growing, very hardy evergreen, especially adapted for windbreaks and grouping. It is a native of central and northern Europe, forming large trees with pleasing glaucous green foliage. Although quite ornamental when young, this species is more picturesque than beautiful with age. Price, 2 to 3 ft., \$1.25 each, \$10.00 for 10.

Note—To the right we give a cut showing the way the roots of our evergreens are balled with earth and tied with burlap, ready for shipment.

Evergreens Ready for Shipment.

SIZE AND QUALITY

When buying Ornamental Shrubs and Vines be sure to note carefully the specifications as to grade. The ones we offer are Two Year, strong No. 1, and are far superior to small size stock, sometimes offered by others at a few cents less.

Hedges

Althea Hedge

Double Althea—(Rose of Sharon)—Unsurpassed by any hardy shrub for freedom of bloom. From midsummer until frost, when few other shrubs are in bloom, the Althea blossoms freely. Grows 4 to 6 feet tall. They have rich foliage and bear large flowers. Very hardy. Of the easiest culture, and are beautiful for hedges. We have the following varieties to offer.

Price, 2 to 3 feet, 45c each. 10 for \$4.00.

Jeanne d' Arc—Pure double white; very full, and superior to any double white known.

Duchesse de Brabant—Dark Rose, large double flowers.

Boule de Feu—Very double, deep red.

Purpure a Flore Pleno—Double purple.

Ardens—Double violet.

Lucy—Purplish red variegated leaved.

Hedges—(Continued)

California Privet—A vigorous-growing variety, of fine habit, thick, glossy, nearly ever-green leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter.

Strong Plants 18 to 24 in.
 Each Ten Hundred Thousand
 .15 \$1.25 \$6.00 \$50.00

Strong Plants 2 to 3 Feet
 Each Ten Hundred Thousand
 .20 \$1.50 \$8.00 \$60.00

Japan Quince—Excellent as a single lawn plant or for ornamental hedge. Grows very compactly, will submit to any amount of pruning while the brilliant and showy scarlet flowers make it exceedingly attractive.

Strong Plants 2 to 3 Feet
 Each Ten
 .60 \$5.00

Honey Locust—Very hardy, and the cheapest and best for defensive hedges. 12 to 18 in., \$7.00 per 100.

Barberry Thunbergii—A shrub of marked excellence on account of its bright green foliage which changes to brilliant colors in the fall, and its bright scarlet berries, which are very conspicuous throughout the winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. Is very hardy, has never been known to winter-kill. It bears the shears well and makes a dense hedge. **Strong Plants 12 to 18 inches, 40c each, \$3.50 per 10, \$30.00 per 100. Strong Plants 18 to 24 inches, 50c each, \$4.50 per 10, \$40.00 per 100.**

TEN
\$4.00

Lilacs—These beautiful shrubs should be planted at every home. The most desirable varieties we give a description of below.

Common White Lilac—(*Syringa Vulgaris Alba*) Stocky strong grower and exceedingly hardy. The bloom is in large white clusters and very fragrant. Thrives well in all localities.

Common Purple Lilac—(*Syringa Vulgaris*). Similar to white except that the twigs are a little more slender and the bloom is a pinkish-purple color; a most profuse bloomer.

Snowball (*Viburnum*)—A well known favorite shrub, with globular clusters of white flowers, blooming the latter part of May. This good old early and sure-flowering shrub is planted perhaps more extensively than any other. It is found in nearly every collection in the gardens and lawn. We have a fine lot of strong plants.

White Fringe—A popular and much admired shrub of moderate growth and rounded form with large dark green glossy leaves, and drooping panicles of beautiful white fringe-like flowers.

Lilac Bush

Hydrangea P. G.

Hydrangea Paniculata Grandiflora—A grand and showy shrub which gives a splendid effect in a border or bed, singly or massed. The colors of the flowers change as the season advances. In spring they are the pink and white of youth, while by the time autumn comes they have reached the bronze of old age. Flowers in large clusters. Price, 60c each; \$5.50 per 10.

Hydrangea P. G. Tree Form—Same as blush, but grown in tree form with single stem, very desirable. \$1.00 each.

Hydrangea Snowball Ever-blooming—This new Hydrangea is the most beautiful hardy flowering shrub introduced in recent years. The plant is very graceful with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty.

It seems to thrive in various soils, and when fully exposed to the sun as well as in partial shade. The profusion of bloom of this new Hydrangea is very unusual. Price, 60c each, \$5.50 per 10.

Flowering Shrubs (Continued)

Spiraea Van Houttei in Full Bloom

Golden Glow or Cone Flower—Among the most valuable hardy plants, growing from 1½ to 7 feet in height, producing showy golden yellow flowers. Very free flowering. Useful cut flowers.

Golden-Leaved Syringa (Aurea)—A very pretty plant of medium size, with golden yellow foliage. It retains its color the entire season and is valuable for creating pleasing and striking contrasts with both green and purple-leaved shrubs.

Syringa (Lemoinei Erectus)—A charming variety of upright growth. Flowers small, yellowish white, fragrant, more clustered than the older sorts, completely covering the bush.

Forsythia (F. viridissima)—A fine hardy shrub. Leaves and bark deep green. Flowers deep yellow, very early in spring.

Deutzia, Pride of Rochester—A new variety. Blooms in May. Double, white tinted with rose on the edge. It excels in size of flowers, profuse bloom and vigorous growth.

Deutzia Double-flowering (D. Crenata flore pleno)—Flowers double, white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Deutzia Gracilis (Slender Branched Deutzia)—A dwarf variety well adapted to planting in cemetery lots and small lawns. It blossoms in June and the flowers are white. It flowers often in winter when the temperature is low. First to flower.

Spiraea Van Houttei—Finest of the Spiraeas giving a most graceful appearance even when out of bloom. The flowers are pure white and borne in dense clusters along the whole length of the branches, often weighing them to the ground. One of the finest ornamental shrubs that we offer. Excellent as a single lawn plant, or for grouping with other shrubs; also a fine hedge plant.

Spiraea Callosa Rosea—Has large panicles of deep rosy blossoms; grows freely; blooms nearly all summer.

Spiraea Prunifolia—A very beautiful variety, flowers white and double. A very profuse bloomer in May. Foliage turns a very beautiful brown color in Autumn. Hardy and desirable.

Spiraea Anthony Waterer (Dwarf Crimson Spiraea)—A most beautiful variety of Bumalda. In habit of growth it is the same as its parent. The flowers are

crimson in the bud and when first open, fading afterwards to a deep pink. It blooms about the close of June, and, if the flowers are cut off as fast as they commence to decay, there will be a continuance of them throughout the season, to some extent. It is useful for edging, planting in masses, or as a single specimen where a low, bushy shrub is required.

Weigelia Candida—The very best of all the white-flowering Weigelas. Flowers pure white and produced in great profusion in June; continues to bloom during the entire summer.

Weigelia D. Eva Rathke—Fine variety. Rich, deep, scarlet blossoms which follow a week after most other varieties.

Weigelia Rosea Nana Variegata (Dwarf)—Leaves margined creamy white. Flowers pink.

Deutzia, Pride of Rochester

Flowering Shrubs (Continued)

Everblooming Butterfly Bush

New Everblooming Butterfly Bush (*Buddleia Variabilis Magnifica*) — Several years ago this was imported from Europe. The name BUTTERFLY BUSH was applied to it because it seems to attract butterflies in large numbers, not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vieing with it in brilliancy of color. This shrub from a young plant set out either in the Spring or Fall, will mature to full size the first Summer, producing a handsome bush, which the first year often attains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-covered flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. It generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable material as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. **SPECIAL MERITS:** 1st, Very hardy; 2d, Blooms the first season; 3d, Flowers from early summer till frost; 4th, Rich, striking color; 5th, Splendid for cutting—very free flowering; 6th, Will thrive anywhere. We have to offer a fine lot of extra stocky field plants about two feet high.

HERBACEOUS PEONIES

A noble flower, almost rivaling the Rose in brilliancy of color and perfection of bloom. The first point in its favor is hardiness. In the severest climate the plants require no other protection than that which they afford themselves. Freedom from all diseases and insects are important arguments in favor of their cultivation. Each succeeding year adds to their size and beauty. No other flower is so well adapted for large, showy bouquets. The Peony may be planted either singly on the lawn or in borders. It flowers early in June. Our collection has been made with great care and includes the best and most distinct varieties.

Duchess de Nemours—Large and full—the most nearly pure white.

Queen Victoria—The broad guard petals are a pretty blush-white; center white slightly edged pink.

Festiva Maxima—About the largest and undoubtedly the most popular Peony of them all. High built flowers borne on long stiff stems; the purest white, inner petals slightly tipped carmine.

Rubra Triumphans—Early. A satiny-finished, intensely rich crimson. Sweetly fragrant.

Louis Van Houtte—Large blooms, very double, bright crimson.

Eugene Verdier—An excellent cutting sort, with broad full flowers without noticeable guard petals. White, evenly suffused shell-pink.

Souvenir de l'Exposition Universelle—Clear rose color. Fragrant.

Agida—Violet rose, very fine flowers.

Rose d'Amour (Calot)—Soft flesh pink, very fresh color, extra large bloom.

Festiva Maxima Peony

Roses

HERE is perhaps no plant or flower so generally cultivated today as the Rose. Its wonderful beauty and fragrance make it the most popular of flowers. For extensive grounds, small lawns, porch trellis or hedges Roses are used with charming effects. Many persons think it difficult to grow Roses, but such is not the case; good soil and a little care will insure fine hardy plants and beautiful blossoms. We have an exceptionally fine lot of Roses to offer this season, all No. 1, hardy field grown, two year old bushes; budded and on their own roots.

Difference in Class of Roses

Although not generally understood, it is well known by Rose Specialists that Roses come under two classes, Hybrid Perpetual and Hybrid Tea. The Hybrid Tea or everbloomer, blooms the entire summer. The Hybrid Perpetual while it blooms profusely during its season, is not a continual bloomer. (In the description of varieties of Roses the abbreviation H. P. denotes Hybrid Perpetual and H. T. Hybrid Tea.)

Planting and Care of Roses

Roses should be planted in good rich soil. Dig the hole deep enough so that it can be set in the ground about two inches below where it was budded. That will prevent suckers from growing up from the natural root. Do not trim the root off too severely, but cut the tops off about eight inches above the top of the ground. Pack good rich soil thoroughly around the roots being careful not to let any compost come in contact with the roots. Keep the top of the earth thoroughly worked around the bushes the entire season. Each following Spring they should be pruned ten or twelve inches. Always use a pruning shears as a knife has a tendency of loosening them from the earth.

Prices, all varieties 2 yr. Strong Bushes
(Except Where Otherwise Noted)

EACH	TEN
65c	\$6.00

Frau Karl Druschki (Sometimes called Snow Queen) (H. P.)—A wonderful rose—fine, large, free-flowering, hardy, white. Extraordinarily strong-growing, branching freely. Foliage large, of heavy texture, but the glory is in its flowers which are immense, and produced with great freedom during the whole season—hundreds of magnificent blooms, full, very deep, and double, and of splendid substance. Petals broad, long and saucer-shaped. Buds egg-shaped long and pointed. Pure, snow-white, without a tinge of yellow, pink or any other color. This great rose is listed by some as Hybrid Tea as it possesses some of that strain.

General Jacqueminot (H. P.)—The leading rose. Deep, brilliant shaded crimson, with large petals, globular with high center. A well-known favorite—one of the best and planted by all who plant roses.

LaFrance (H. T.)—This is probably the most popular rose in cultivation. Both buds and flowers are of lovely form and grand size exceedingly sweet. Color fine peach-blossom, elegantly clouded with rosy flesh. Begins to bloom while very small, and continues bearing until stopped by freezing weather.

Gruss an Teplitz (H. T.)—The color is brightest scarlet, shading to deep, rich, velvety crimson. It is very fragrant, the freest grower and most profuse bloomer. The mass of color produced is wonderful, and the foliage is extremely beautiful, all the younger growth being a bronzy plum-color. A queen among scarlet bedders.

Frau Karl Druschki

Roses (Continued)

Killarney (H. T.)—A vigorous growing Hybrid Tea of recent introduction, with so many good points in its favor that it has become a standard variety. Its long pointed buds, excellent substance and delicious odor recommend it to every lover of the rose. Color flesh pink, shaded with white and suffused pale pink.

American Beauty (H. P.)—Flowers very large of beautiful form and very double. Color a deep rich rose. Fragrance delightful, resembling LaFrance or the old-fashioned Damask Rose; each shoot produces a bud.

Alfred Colomb (H. P.)—Brilliant crimson. Large, full and of fine globular form. Extremely fragrant. Foliage large and handsome. A good rose for general cultivation.

Anna de Diesbach (H. P.)—One of the old varieties introduced in 1858. Color is a beautiful shade of carmine-pink. Flowers are extra large, full and very sweet. A rose that every one should have.

Margaret Dickson (H. P.)—A magnificent rose, white, with pale flesh. Extra large flower, of splendid form and substance, with waxy shell-like petals fragrant and pleasing. A vigorous and free-flowering variety, with handsome, large, dark green foliage.

Paul Neyron (H. P.)—The largest Rose. This reliable and well known H. P. Rose, sometimes called the "Peony Rose" still leads all others of its color and class. Color clear pink. Added to its other qualities, it is entirely hardy, also very fragrant. Has fine, erect habit, is a strong grower, beautiful, large, smooth, glossy foliage.

Killarney Rose

Mrs. John Laing (H. P.)—A splendid free-flowering, sweetly fragrant rose of beautiful form. Color, clear, bright, shining, silvery pink, exquisitely shaded. Immense flowers, full and double, borne in great profusion on long stiff canes. Undoubtedly one of the best bedding varieties yet introduced.

Magna Charta (H. P.)—Extra large, full flowers, very double; of fine form and sweet. Color clear rosy red, beautifully flushed with violet crimson. A sure and profuse bloomer; one of the hardiest and best for general planting. Large light green foliage. Flowers very fragrant.

Marshall P. Wilder (H. P.)—One of the best dark red Hybrid Perpetuals. The flowers are large and perfect in form, on good lengths of stems, making them very desirable for cut flowers. Color, bright cherry red, changing to crimson. Very fragrant. It continues to bloom profusely long after the other Hybrid Perpetuals are out of flower.

Prince Camille de Rohan (H. P.)—This is a magnificent rose, celebrated the world over for its large, handsome, fragrant flowers and the freedom with which they are produced. The color is a deep, rich velvety crimson passing to intense maroon.

Coquette des Alps (H. P.)—White, slightly shaded with carmine. Strong grower and a great favorite. This variety is very valuable. It continues to give a profusion of blossoms for weeks after general varieties have finished.

Baron de Bonstetten (H. P.)—Rich, velvety maroon, large and full—a splendid sort.

Paul Neyron

WE MAKE FIRM FRIENDS OF OUR CUSTOMERS BECAUSE WE DO AS WE AGREE

Clio Rose

DWARF POLYANTHA OR EVERBLOOMING BABY ROSES

This type has been in existence only a few years, but so much were they needed and so admirably do they meet the need, there is no class of Roses today being so widely planted nor so high in general estimation. They are such splendid, hardy, showy, compact bedders; they keep their color so well and continue in full bloom through such a remarkably long season, there is no end to the uses to which they may be put. They are excellent for hedges and for bordering paths where a continuous bloom is desired. We offer only the following best varieties.

Crimson Baby Rambler—This is the original dwarf baby rambler. One of the best hardy bedding roses in existence. The plants are vigorous and grow from 18 to 24 inches. The foliage is dark glossy green and is remarkably free from insects and fungus. The flowers are borne in clusters of 20, 30 or more—in every way resembling the blossoms of the climbing crimson rambler. It blooms outdoors from May to November and indoors the year around.

Pink Baby Rambler—The showiest and prettiest of the pink "Baby" roses. This charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom. The color is irresistible.

White Baby Rambler—As delicately tinted and as full of clusters as any Polyantha Rose. Its pure white flowers are perfectly double, and bloom with the unceasing freedom of the reds and pinks of this class.

WE SAVE YOU MONEY—WE GIVE YOU HIGH GRADE TREES. LET US PROVE IT.

Clio (H. P.)—Flowers very large, color flesh, shaded in center to rosy-pink. Its perfect hardiness, vigorous growth and freedom of bloom make it most valuable for planting in the Rose garden. It is of large size, exquisite color and delicious fragrance and its flowers at perfection are as large as peonies.

Hugh Dickson (H. P.)—Intense crimson, shaded scarlet; very large, full and magnificent form. Awarded the Gold Medal of the National Rose Society of England. Finest rose of its color.

Madame Plantier (H. P.)—Pure white, above medium size; full. Produced in great abundance early in the season. Foliage rather small, seven leaflets. One of the best white roses for hedges and for massing in groups. Specially recommended for cemetery planting.

Madame Gabriel Luizet (H. P.)—Rose pink, distinct, very large, cupped-shaped; somewhat fragrant. One of the choicest.

Persian Yellow—An old favorite, and still one of the best yellow Roses for the yard. Deep golden yellow, semi-double; blooms freely in June.

THE SIZE AND SHAPE OF YOUR ROSE- BED

Beds $4\frac{1}{2}$ feet wide accommodate three rows nicely, and require 12 Roses to every 6 feet. A bed 3 feet wide with two rows will require 12 Roses to every 9 feet; 24 Roses if 18 feet long, etc. The above estimate is based upon planting the Roses 18 inches apart each way. 18 inches to 2 feet is about the right spacing for most bedding Roses. In warm countries, where growth is most luxuriant, and for the big, bushy sorts, more room will be required. Beds of any other shape or size may be laid out to suit one's fancy.

An avenue effect can be produced by planting Tree Roses (see page 54) on either side of a walk, about 5 to 10 feet apart and in front and between them Everblooming Tea and Hybrid Tea Roses, with a solid row of Dwarf Polyanthas of the Baby Rambler type to form a bright edging along the front. These Everblooming Baby Ramblers are so hardy they will live without protection, even in the coldest climates. The cost is not great, and the effect produced by such an arrangement is really superb.

Direct from Grower to Planter

ROSES (Continued)

HARDY EVERBLOOMING CLIMBING ROSES

Crimson Rambler—The best known and most popular of all the climbing roses. A rapid grower making sometimes 8 to 10 feet in a season. Flowers are borne in clusters of 15 to 25 perfectly shaped blossoms of a rich glowing crimson. When in full bloom the vine appears to be a perfect mat of rich red flowers—perfectly hardy everywhere.

Dorothy Perkins (Pink)—This is one of the new rambler types. Has the same strong habit of growth as the Crimson. Flowers are borne in large clusters of 25 to 30 and are a beautiful shell pink. The individual flower is larger than the Crimson Rambler. A valuable acquisition to the Climbing Roses.

Dorothy Perkins (White)—A white flowered form of Dorothy Perkins, very free of bloom and especially valuable because of the rarity of good white Climbing Roses.

Yellow Rambler (Goldfinch)—Light canary shade; clusters smaller, individual flowers larger than Crimson.

Climbing American Beauty—The latest triumph in American Rose growing—the true climbing American Beauty in all its promise and glory. The same as American Beauty practically. Large flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance.

"Our Little Helpers"
John, Edward and Mary Kelly

ROSES ON THEIR OWN ROOTS

We have the following three varieties to offer of Hybrid Tea or Everblooming Roses on their own roots:

Pink Maman Cochet (H. T.)—This superb rose is well known as a queen among Roses—one of the best and most beautiful varieties ever grown, and quite hardy. The flowers are of enormous size, very full and of great depth and substance, borne on long strong stems, just right for making bouquets. Color, rich coral-pink, elegantly shaded with rosy crimson. Has broad, thick, shell-like petals and makes superb long-pointed buds. Immense bloomer, and flowers the whole season. Deliciously sweet and a hardy, vigorous grower.

White Maman Cochet (H. T.)—A splendid Rose. Has all the good qualities of Maman Cochet. Like some other white roses, this variety especially in the autumn, shows pink markings on the outside petals when the flower is in bud. When open the blooms are pure white and entrancingly lovely, large, fragrant, hardy and freely produced.

William R. Smith (H. T.)—A vigorous grower, excellent in quality, bountiful in bloom. It will thrive abundantly in almost any location. The flowers are large, full and double, most exquisite in form, and the petals are so firm they look like wax, softly curled. Color cream with flesh tint tips, buff yellow base, and the center and heart of Pink. Perfect buds. The flowers are borne on long stems. Fragrance delightful. Blooms profusely.

Kelly Bros. Wholesale Nurseries, Dansville, N. Y.

Frankfort, N. Y., May 17, 1920.

Gentlemen:—The Norway Maples arrived in good condition and have just finished setting them out. We thank you very much for sending us such large healthy looking trees. They were much larger than expected and it will mean quite a saving of time for us and I assure you we appreciate it greatly. Very sincerely yours,

DR. FENIMORE PARKHURST.

- 1 Rochester
- 1 Hiley
- 1 Early Crawford
- 1 Carman

Special Price \$1.98

List of Experimental Stations

All fruit growers should be familiar with the literature issued by their nearest Experiment Station relating to the culture of fruit trees and the raising of all kinds of fruits. Nearly all of the Stations mentioned below issue bulletins on a large variety of subjects, and, at the present time, are devoting a great deal of attention to the raising of fruit, injurious insects, diseases of fruit trees, spraying, etc. Any resident is entitled to receive the bulletins from his nearest station, free of charge, and all that the applicant has to do is to direct a letter to "The Director," "Agricultural Experiment Station," at the city or town where the station is located as shown in the list below. If you have an orchard that is not producing the fruit that it should or is infected with some disease, you can get just the information you desire from these Stations. They are always pleased to hear from the residents especially of their own state:

Alabama—Auburn	Maine—Orono	Ohio—Wooster
Arizona—Tucson	Maryland—College Park	Oklahoma—Stillwater
Arkansas—Fayetteville	Massachusetts—Amherst	Oregon—Corvallis
California—Berkley	Mich.—Agriculture College P. O.	Pennsylvania—State College P. O.
Colorado—Fort Collins	Minnesota—St. Anthony Park	Rhode Island—Kingston
Connecticut—New Haven	Miss.—Agricultural College P.O.	So. Car.—Clemson College P. O.
Delaware—Newark	Missouri—Columbia	South Dakota—Brookings

Indiana—Lafayette	New Jersey—New Brunswick	Virginia—Blacksburg
Iowa—Ames	New Mexico—Messila Park	Washington—Pullman
Kansas—Manhattan	New York—Geneva	West Virginia—Morgantown
Kentucky—Lexington	North Carolina—Raleigh	Wisconsin—Madison
Louisiana—Baton Rouge	North Dakota—Fargo	Wyoming—Laramie

A picture of our large, modern, frost-proof packing house where all trees are carefully graded, packed and shipped. We have a private switch right to this packing house so there is no excuse for our trees and plants to be exposed before they leave our hands and we guarantee that they will carry safely through to destination with our careful method of packing.
